

# 67<sup>TH</sup> ELECTRONIC MATERIALS CONFERENCE

JUNE 25 - 27, 2025 || DUKE UNIVERSITY || DURHAM, NORTH CAROLINA

## CALL FOR PAPERS

### IMPORTANT DATES

**November 1, 2024**

Submission Site Opens

**January 27, 2025**

Abstracts Due

**March 24, 2025**

Acceptance Notification

**April 18, 2025**

Late News Deadline/Student  
Oral Presentation Award Self-  
Nomination Deadline

**May 15, 2025**

Discounted Registration Rate  
Deadline

### ORGANIZERS

#### Conference Chair

**Daniel Wasserman**

University of Texas at Austin

#### Program Chair

**Adrienne Stiff-Roberts**

Duke University

#### Treasurer

**Kevin Daniels**

University of Maryland

#### Secretary

**Stephanie Law**

Penn State University

The Electronic Materials Conference (EMC) is the premier annual forum on the preparation, characterization, and applications of electronic materials. EMC provides a unique opportunity for researchers from academia, government labs, and industry to meet and share the latest cutting-edge results across the broad range of fields under the umbrella of electronic materials. This year's event will feature a plenary session, topical sessions, a poster session and more.

EMC is coordinated with the Device Research Conference (DRC), which will be held during the same week as EMC, from June 22-25, 2025. The colocation and overlap of DRC and EMC underscores the strong interdependence of device and electronic materials research and provides opportunities for the fruitful exchange of information between attendees of both Conferences.

#### Topics of interest:

- » Electronic Materials Science and Technology
- » Energy Storage and Conversion Materials
- » Nanoscale Science and Technology
- » Organic Materials, Thin Films, and Devices
- » Oxide Semiconductors and Dielectrics
- » Wide Bandgap Semiconductors
