The Cleveland FES (Functional Electrical Stimulation) Center is a transdisciplinary alliance specializing in the fields of biomedical engineering, neural research, and rehabilitation. We embrace open-door, collaborative, compassionate, and inquisitive engagement. Together, we are solving real medical problems that impact the veteran and civilian population.

Editor's Note

The Neural Engineering Conference of the IEEE Engineering in Medicine and Biology Society hosted an electronic paper submission process for the conference. It was the responsibility of the submitting author to ensure the document was viewable and without errors that would prevent the Conference from including the paper in the Digital Proceedings in IEEE Xplore or the Website.

All conference papers were peer-reviewed by experts chosen by the NER Conference Technical Program Board for all contributed and one-page abstract papers.

Code of Ethics

The EMBS AdCom approved the following Code of Ethics to provide a guideline of ethical consideration for all members and to establish its support for ethical conduct in research.

Patients and Human Subjects

1. Respect human dignity and privacy of patients and human subjects.

Information

2. Ensure proper safeguarding of all confidential information, including information pertinent to patients, subjects, commercial entities, and trade secrets.

Environment

3. Promote a culture of cost-effectiveness.
4. Support the preservation of a healthy environment.

Research

5. Engage in research aimed at advancing the contribution of science and technology to improving health-care provision.
6. Report research results with scientific integrity and proper due credit.
7. Observe the rights of human research subjects and strive for a balance between benefits and potential harm.
8. Ensure a responsible and humane use of animals in research.
9. Conduct clinical research studies in accordance with Good Laboratory Practices (GLP) and Good Clinical Practices (GCP).

Profession

10. Hold in high regard the inter-disciplinary nature of healthcare delivery and research. Foster collegial inter-disciplinary relationships. Respect, value, and acknowledge the contribution of others.
11. Encourage a culture of knowledge exchange and mentorship.
12. Avoid or properly disclose conflicts of interest.

The IEEE Engineering in Medicine and Biology Society advances the application of engineering sciences and technology to medicine and biology, promotes the profession, and provides global leadership for the benefit of its members and humanity by disseminating knowledge, setting standards, fostering professional development, and recognizing excellence.

The field of interest of the IEEE Engineering in Medicine and Biology Society is the application of the concepts and methods of the physical and engineering sciences in biology and medicine. This covers a very broad spectrum ranging from formalized mathematical theory through experimental science and technological development to practical clinical applications. It includes support of scientific, technological and educational activities.

Welcome Message

Dear Colleagues,

It is our pleasure to welcome you to Charm City – Baltimore for the 11th International IEEE EMBS Conference on Neural Engineering (NER).

The theme of this year's conference is artificial intelligence in neural engineering. When we began thinking about hosting this conference as an organizing committee, we wanted to go beyond traditional NER themes of electrodes and interfaces, and look at closing the loop, new technologies, sensing and actuating modalities, and future directions for our field.

In our call for submissions, we highlighted four distinct quadrants: a) Responsive neuroengineering; b) Innovation in High-Resolution Neuroimaging; c) the Brain as a part of a complex environment; and d) Impact in neuroengineering. Each distinct quadrant revolved around our central theme, and included a number of sub-categories.

We have been delighted and amazed with the breadth and extraordinary quality of submissions, and agonized over which to include, and which to highlight with podium talks and plenary presentations. In the end our podium sessions coalesced around: 1) Transducers for actuating a neural response; 2) Novel sensing, image analysis, and data extraction; 3) Transducers for sensing neural and broader physiological activity; 4) Closed-loop prostheses; 5) Brain-computer and brain-machine interfaces; and 6) going beyond the neural interface. We think of sessions 1 and 3 as falling in quadrant a; session 2, in quadrant b; sessions 4 and 5, in quadrant c; and session 6 in quadrant d.

Accompanying and thematically adjacent Mounya Elhilali will present her work on closing the loop between sensory and cognitive systems on Tuesday morning. In the afternoon, Amadeu Llebaria will present his work on photopharmacology as a novel transducer for neural control. Wednesday morning features Jacob Robinson presenting his work using magnetic and optical technologies in neural interfaces. Wednesday afternoon, Tim Denison will introduce us to his thinking in the role of biological rhythms on the design and operation of neural interfaces.

We are particularly delighted in both the strength and incredible diversity of our keynote, and podium speakers, and poster presenters. We very much hope you will be as well, with opportunities to interact with new generations of wonderful neural engineers hailing from all over the world.

On behalf of the Organizing Committee, we welcome you to Charm City! We are confident you will learn, have new ideas, meet great colleagues, and form new collaborations over the coming three days. Thank you for attending NER 23, and we look forward to interacting with you personally over the course of the conference!

General Conference Information

Registration

Registration is located on level 300 of the Baltimore Convention Center outside of rooms 307-310 and will be open from Monday, 24 April through Thursday, 27 April. Staff will be able to assist you during the following times.

Monday, 24 April	08:00 am – 5:00 pm
Tuesday, 25 April	08:00 am – 5:00 pm
Wednesday, 26 April	08:00 am – 5:00 pm
Thursday, 27 April	08:00 am – 3:00 pm

*Attendees must wear their badges at all times to gain access to the conference.

Food Functions

Coffee breaks are provided on Monday - Thursday for conference attendees. Attendees will be on their own for all lunches. There will be a variety of vendors on site to purchase meals, and there are also multiple options close to the venue.

The Tuesday evening welcome reception is included in the registration fee and is walking distance from the Baltimore Convention Center at the National Aquarium (501 E Pratt St., Baltimore, MD 21202). Guest tickets are available for the Welcome Reception through the registration site or can be purchased at the registration desk for \$75. Guests will also be issued a name badge to get into the welcome event at the National Aquarium in Baltimore. Two drink tickets/attendee and heavy hors d'oeuvres will be provided.

NOTE: All attendees are required to present their name badge to enter the aquarium.

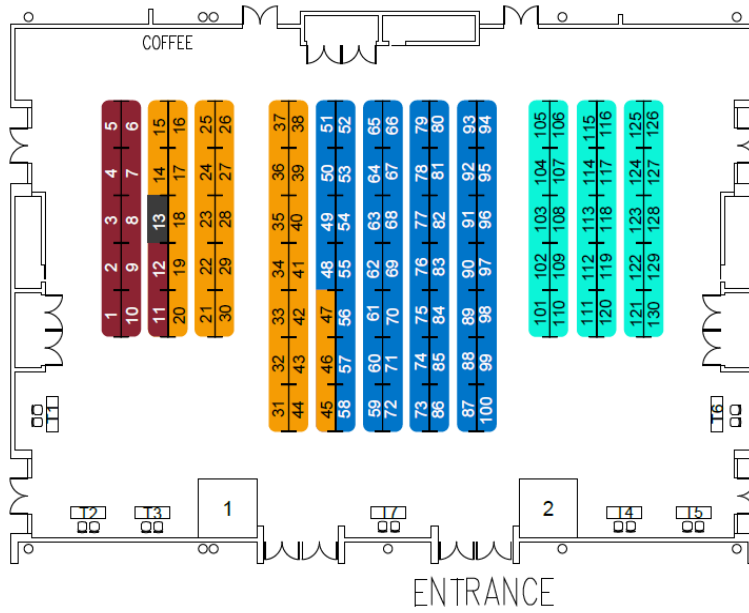

Poster Sessions

All posters will be on display Tuesday – Thursday during the conference. Please hang your poster up by 9:30 am the day of your sessions. Authors are **required** to be standing by and presenting their posters during their scheduled time slots. A map of the poster area can be found on the following pages, and an ID slip will be placed with your paper ID in your designated spot on the poster board. Please remove your poster immediately after your last session is over.

CONFlux

This year, we will be providing a mobile web app to see who will be presenting at IEEE NER 2023! Credentials and details to log in to the app will be sent on 23 April. You will be able to browse presentations, attendees, and create your own personalized agenda.

Program at-a-Glance

Workshop Day Monday, April 24		Day 1 Tuesday, April 25		Day 2 Wednesday, April 26		Day 3 Thursday, April 27	
9:00-10:15	Workshops	9:00-9:15	Opening Remarks	9:00-10:00	Podium Talks: 3. Transducers - sensing	9:00-10:00	Podium Talks: 5. BCI/BMI
		9:15-10:15	Plenary Keynote: Mounya Elhilali				
10:15-10:45	Coffee Break	10:15-11:00	Poster & Exhibit Viewing and Coffee Break	10:00-11:00	Poster & Exhibit Viewing and Coffee Break	10:00-11:00	Poster & Exhibit Viewing and Coffee Break
10:45-12:00	Workshops	11:00-12:00	Podium Talks: 1. Transducers - actuating	11:00-12:00	Plenary Keynote: Jacob Robinson	11:00-12:00	IEEE Brain Panel
12:00-13:00	Lunch - on your own	12:00-13:00	Lunch - on your own	12:00-13:00	Lunch - on your own	12:00-13:00	Lunch - on your own
13:00-14:15	Workshops	13:00-14:00	Poster & Exhibit Viewing	13:00-14:00	Poster & Exhibit Viewing	13:00-14:00	Poster & Exhibit Viewing
14:15-14:45	Coffee Break	14:00-15:30	Podium Talks: 2. Novel sensing, image analysis, and data extraction	14:00-15:30	Podium Talks: 4. Closed-loop Prostheses	14:00-15:00	Podium Talks: 6. Beyond the neural interface
14:45-17:00	Workshops	15:30-16:00	Coffee Break	15:30-16:00	Coffee Break	15:00-15:15	Closing Remarks
		16:00-17:00	Plenary Keynote: Amadeu Liebaria	16:00-17:00	Plenary Keynote: Tim Denison		
		19:00-22:00	Welcome Reception				

Keynote Speaker - Mounya Elhilali, PhD

Tuesday, April 25, 9:15-10:15 EDT

Room 307-310

Moderator: Najim Dehak, Johns Hopkins University

Mounya Elhilali, PhD

Johns Hopkins University, USA

Perspectives on Hearing Technologies: Closing the Loop Between Sensory and Cognitive Systems

Advances in audio technologies are opening new frontiers in human-human and human-machine communications both for normal users and those with communication disorders. Yet, intelligent processing of our auditory surrounds is a nontrivial feat that has to balance the state of the system (e.g., pathophysiology), with the observed sensory signal as well as our goals, expectations, and attentional state (what we hear, what we want to hear, what we expect to hear).

The brain faces a similar feat with complex sensory signals constantly impinging on its senses; and biology evolved a neural infrastructure that enables intelligent processing of its sensory surrounds. Our sense of hearing holds deep and powerful engineering lessons for adaptive processing of sounds in everyday life. This talk presents research that reverse engineers the intricate brain circuitry engaged in processing dynamic soundscapes to balance sensory and cognitive functions; and discusses implications for audio technologies to improve communication.

Biography

Mounya Elhilali is a professor of Electrical and Computer Engineering at the Johns Hopkins University with a joint appointment in the department of Psychology and Brain Sciences. She directs the Laboratory for Computational Audio Perception and is affiliated with the Center for Speech and Language Processing and the Center for Hearing and Balance. Her research examines sound processing by humans and machines in noisy soundscapes and investigates reverse engineering intelligent processing of sounds by brain networks with applications to speech and audio technologies as well as medical listening systems. She received her Ph.D. degree in Electrical and Computer Engineering from the University of Maryland, College Park. Dr. Elhilali was named the Charles Renn faculty scholar in 2015, received the Johns Hopkins catalyst award in 2017 and was recognized as outstanding women innovator in 2020. She is the recipient of the prestigious National Science Foundation career award in 2009 as well as the Office of Naval Research young investigator award in 2012.

Keynote Speaker - Amadeu Llebaria, PhD

Tuesday, April 25, 16:00-17:00 EDT

Room 307-310

Moderator: Pedro Irazoqui, Johns Hopkins University

Amadeu Llebaria, PhD
IQAC-CSIC, Spain

Photopharmacology: Using Light for A Precise Spatiotemporal Control of Drug Activity

The administration of a photocontrolled ligand in combination with illumination that is patterned in space and time can provide a novel degree of control and regulation of receptor activity. This method would allow precisely focusing the action of the ligand controlling the location and the temporal extension of its effects. When applied in vivo, the use of photoregulation can reduce side effects by targeting receptors located in target tissues, establishing personalized drug schedules to patient needs. We have recently developed light-regulated negative allosteric modulators for metabotropic glutamate receptors (mGluRs). These include Alloswitch-1¹ and related phenylazopyridines with NAM activity in mGlu5 and OptoGluNAM4.1, the first mGlu4 NAM active in vivo². These photopharmacological tools are based in photoswitchable azobenzene scaffolds that serve for the real-time control of the receptors in cell assays. The molecules show a robust activity dependent of the illumination conditions allowing the real-time regulation of the intracellular effects of these GPCRs.³ Moreover, when the molecules are applied in vivo and combined with external or internal light sources, we can register interesting light dependent behavioral effects in zebra fish embryos, tadpoles and rodents, including some pain models. We have shown that localized (in)activation with light of a specific area in the amygdala of live mice results in a control of chronic pain.⁴ The key experiment for this uses a mGlu4 photoswitchable azobenzene ligand to control activity of endogenous receptors in vivo with light. With this molecule, we rapidly and reversibly inhibited chronic pain behavioral symptoms after illumination in the amygdala of rodent brain while measuring the painful response in the periphery. We have also developed molecules for the photocontrol of adrenergic receptors,⁵ and a derivative to release locally morphine in vivo to control pain avoiding opioid side-effects.⁶ Photopharmacology approaches are effective to study the dynamic response of localized receptors and show potential for spatiotemporal regulation of drugs.

Biography

Amadeu Llebaria is Professor and head group at IQAC-CSIC in Barcelona (Spain). He graduated in chemical engineering at Institut Químic de Sarrià (IQS, Barcelona) and in chemistry at Universitat Autònoma de Barcelona (UAB). He obtained a PhD in chemical engineering (IQS, 1990) and a PhD in chemistry (University of Barcelona, 1992) working in organic synthesis methods mediated by transition metals. After a postdoctoral period in Germany as Humboldt fellow with Armin de Meijere (Goettingen) he obtained a scientist permanent position at CSIC (Spanish National High Research Council) where he has developed his scientific career. During this time he has been working in different fields related to the synthesis and optimization of bioactive molecules. He has lead several basic research and applied projects financed by public and private sources. Dr. Llebaria interests are related to the design and synthesis of molecules with biological activity. He is now working in different drug development projects in collaboration with biotech and pharmaceutical companies. The basic current research activities of Dr. Llebaria at CSIC within the Medicinal Chemistry Lab include research on photopharmacology, light control of protein activity by means of small-molecule photoswitches or photolabile caged compounds. The molecules developed have use as pharmacological tools in basic neuroscience and aim to define novel and more precise potential therapeutic treatments for difficult-to-treat disorders. Other research lines are related to selective protein labeling based on bioorthogonal click-chemical reactions and light-operated molecular probes. He has a large experience in multidisciplinary collaborative research at the interface between chemistry and biology and in the development of molecules for biological and therapeutic applications.

Keynote Speaker - Jacob Robinson, PhD

Wednesday, April 26, 11:00-12:00 EDT

Toward Minimally Invasive Neurotech: Magnetic and Optical Technologies to Miniaturize Neural Interfaces

Miniature implanted devices capable of manipulating and recording biological signals promise to improve the way we study biology and the way we diagnose and treat disease; however, to create an effective bioelectronic network we must overcome a myriad of engineering challenges. In this talk, I will describe how we can leverage unique device physics and material properties to overcome some of these challenges. Specifically, I will show how magnetoelectric materials allow us to effectively transmit data and power to mm-sized devices deep inside the body. I will also describe how we can create compact wearable and implantable fluorescent imaging systems by combining photonic technology with computational imaging. Overall, these technologies provide a suite of miniature magnetic and optical neural interfaces that could support next-generation brain-computer interfaces and closed-loop electronic medicine.

Biography

Jacob Robinson is an Associate Professor in Electrical & Computer Engineering and Bioengineering at Rice University and an Adjunct Associate Professor in Neuroscience at Baylor College of Medicine. His research group uses nanofabrication technology to create miniature devices to manipulate and monitor neural circuit activity. He received a B.S. in Physics from UCLA in 2003 and a Ph.D. in Applied Physics from Cornell University in 2008. He then began a postdoctoral research position in the Department of Chemistry and Chemical Biology at Harvard University, where he created silicon nanowire devices to probe the electrical and chemical activity of living cells. In 2012, he joined the ECE and BioE departments at Rice. Dr. Robinson is a performer on several DARPA neurotech and bioelectronics programs and currently leads one of the N3 teams creating non-surgical neural interfaces. Dr. Robinson is the recipient of the DARPA Young Faculty Award, the Materials Today Rising Star Award, and is a Senior Member of IEEE. He previously served as the co-chair of the IEEE Brain Initiative and a core member of the IEEE Brain Neuroethics working group. He is also CEO and Co-Founder of Motif Neurotech.

Keynote Speaker - Timothy Denison, PhD

“Bioelectronic Zeitgebers?” Considering how biological rhythms should factor into the design and deployment of neural interfaces

Implantable bioelectronic systems that stimulate the nervous system are an effective adjunct therapy for Parkinson's disease, epilepsy, heart arrhythmia/failure, and chronic pain. Clinical studies are underway currently for inflammation, sleep apnea, and mixed urinary incontinence.

Most existing bioelectronic devices run a fixed stimulation method without consideration of time of day. However, many aspects of our physiology vary in a diurnal and/or circadian manner. In particular, symptoms for many disorders as well as treatment efficacy can vary with time of day, and sleep disturbances remain a common comorbidity of chronic disease. Conversely, nervous system stimulation therapies have the potential to affect physiological rhythms including our sleep/wake cycle. The chronic sensing capabilities of next-generation devices are providing a unique scientific window into the impact of rhythms on therapeutic efficacy, and likewise into therapy's influence on rhythm-related symptoms and physiology. I will describe the design of these investigational research systems and report pilot results from feasibility trials. In particular, I will provide examples how stimulation can be timed to symptoms, and how the stimulation pattern can help drive temporal physiology processes – i.e. the bioelectronic equivalent of a “zeitgeber” from a circadian perspective.

Early results suggest that to maximize potential clinical benefits, neural engineers should more carefully consider how to integrate chronobiology into future therapy designs, research protocols, and ultimately clinical deployment. I will then summarize the emerging opportunity to recognize, and potentially promote, healthier biological rhythms, in order to optimize treatment options for chronic conditions.

Biography

Professor Denison holds a joint appointment in Engineering Science and Clinical Neurosciences at Oxford, where he explores the fundamentals of physiologic closed-loop systems in collaboration with the MRC Brain Network Dynamics Unit. Tim also serves as an advisor to several governments and industry boards on the field of translational medical devices; in particular, he helps define strategies for mapping scientific discovery to product development roadmaps within the regulatory and economic constraints of medical systems. Prior to Oxford, Tim was a Technical Fellow at Medtronic PLC and Vice President of Research & Core Technology for the Restorative Therapies Group, where he helped oversee the design of next-generation neural interface and algorithm technologies for the treatment of chronic neurological disease. In 2015, he was elected to the College of Fellows for the American Institute of Medical and Biological Engineering (AIMBE). He has an MS and PhD from MIT in electrical engineering, an AB in Physics, and MBA from the University of Chicago.

Workshop - Enabling Neurotechnology Translation

Room 302

Two NIH-funded national hubs, NTH (jointly between Johns Hopkins University and Howard University) and CINTA (Massachusetts General Hospital), hold spring and fall funding opportunities up to \$500k per year seeking innovators to address unmet needs for clinical conditions impacted by the nervous system. This workshop will address the common challenges innovators face on their path towards creating a market ready product. We will describe how funding and mentorship from the hubs aims to accelerate neurotechnology translation and to open pathways for new and traditionally under-represented innovators. Attendees will have opportunities to hear from speakers with experience in commercialization, inclusive innovation, and FDA regulatory guidance.

Workshop objectives

There are unique learning objectives and benefits for the attendees

1. Participants will learn about the journey to translate scientific findings and to bring forward solutions that impact human health for all.
2. Participants will understand the innovation support available from the Blueprint Medtech Incubator hubs to accelerate the development of early-stage neurotech solutions for first-in-human testing.
3. Participants will be presented several case studies that illustrate the challenges faced when translating novel ideas to the bedside.

Workshop agenda:

Challenges identifying revolutionary ideas and the most promising solutions: Innovators will be assessing cutting edge technologies and selecting those with the highest potential for impact on neurological health. The challenge is complex, because potential for impact depends on key areas of risks: (i) risks to commercial viability, (ii) risks to technical development, and (iii) team risks. Within each of these, many further risks reside. For example, commercial viability depends on a wide range of factors, such as value proposition, regulatory pathway, barriers to entry, and competitive landscape, including medical workarounds. NTH and CINTA can work with innovators to ensure the proposed solution thoroughly evaluated and provide the support and resources to create a feasible plan to achieve milestones and deliverables.

Agenda - April 24, 2023

- 9am-9:15am - Workshop Introduction, Neurotechnology hubs (NTH and CINTA) and roadmap to sponsoring and achieving translation (Nitish Thakor, PhD Program Committee NER 2023)
- 9:15am-9:45am - Planning your Translation Pathway - University to Start-up (Youseph Yazdi, PhD - Executive Director, Center for Bioengineering Innovation and Design at JHU)

(15 min break)

- 10:00am-10:30am - Equitech & Inclusive Innovation (Jamie McDonald, CEO UpSurge)
- 10:45am-11:45am - Blueprint Medtech Incubator Hub process & resources (Santosh Venkatesha, Operations Director NTH, Penny Carleton, Director Clinical Innovation CINTA, & NIH Program Officers)
- 12pm-1pm - Lunch – on your own
- 1pm-2pm - NeuroTech Innovation Stakeholder Speaker: David McMullen, MD Office Director, Office of Neurological and Physical Medicine Devices, CDRH, FDA
- 2pm-3:30pm - Showcase of cutting edge emerging neurotech solutions
 - 2:00-2:15 - Team 1: Development of wearable ultrasound/photoacoustic device for real-time, non-invasive intrapartum fetal and labor assessment
 - 2:15-2:30 - Team 2: Device for safe and effective treatment of major depression
 - 2:30-2:45 - Team 3: Full-brain image-guided phased-array TMS system with built-in MRI, targeting autism spectrum disorder (ASD) as the first indication
 - 2:45-3:00 - Team 4: Subgaleal Hyper-chronic EEG Monitoring Platform
 - 3:00-3:15 - Team 5: EEG Signal and Intrinsic Imaging for Blood Flow and Oxygenation: An Optrode for Use in Epilepsy Neurosurgery
 - 3:15-3:30 - Team 6: Photoacoustic Retinal Prosthesis
 - 3:30-3:45 - Team 7: Development and Testing of BlueStem Dual Nerve Stimulation Device for Acute Ischemic Stroke
- 3:45 pm-4:30pm - Panel (David McMullen, NTH & CINTA Leadership, NIH Program Officers)

Workshop - BCI: State of the Art and Art of the Possible

Room 303

This workshop will engage members from all areas of the neurotechnology community – from students to PIs, from regulators to CEOs, and investors and other funders, in a review of the current trends and breakthroughs in BCI technology. Presenters include Blackrock Neurotech, Motif Neurotech, Paradromics, Precision Neuroscience, and Synchron. Senior executive representatives from each company will provide their respective visions for a patient-centric future of brain-computer interfaces and how to achieve that vision from a technical perspective.

Agenda

9:00-10:15am – State of the Art: brief technology overviews from each of the participating companies

10:15-10:30am – Coffee Break

10:30am-12:00pm – The Art of the Possible: a panel discussion of the executives to address the following:

1. Endpoints for BCI clinical trials
2. What are unique considerations for technology translation and scalability for BCI? How to engage early with payers to ensure successful commercial translation of BCI?
3. How can the collective onstage here, work together to advance translation in terms of collective bargaining for regulatory and reimbursement strategy, ethics, and other challenges that the field will face?
4. How do we grow the talent pool for the BCI industry?
5. What topics in mainstream media coverage of BCIs should we be legitimately concerned about?

Objectives

The objective of this workshop is to inform and engage with participants/contributors in the field of BCI development and commercialization. The organizers will identify a scribe to capture the proceedings and develop a white paper for dissemination and endorsement by the presenters as well as the attendees. We will seek a publication partner for wide distribution.

Outcomes

Presenters and participants will get updates on the state of the art of commercial BCIs as well as understand and provide feedback on important challenges facing the field today and in the near future.

Speakers

- Blackrock Neurotech: Marcus Gerhardt, Co-Founder and CEO and Rob Franklin, Director of Brain Computer Interfaces
- Motif Neurotech: Jacob Robinson, Co-Founder and CEO
- Precision Neuroscience: Michael Mager, Co-Founder and CEO and Craig Mermel, President and Chief Product Officer
- Paradromics: Matt Angle, CEO
- Synchron: Riki Banerjee, Vice President, Research and Development
- FDA: Julia Slocomb, Lead Reviewer
- Satori Neuro: Amy Kruse, General Partner and Chief Investment Officer

Workshop - Machine-Brain Interfaces: Improving the Human and Machine Interactions

Room 303

Different Brain-Machine Interfaces (BMI) have been developed in the past few years to restore function or improve the quality of life for people with limb difference and neural disorders. However, there is still a long way ahead to improve the interaction between the machine and the human. For instance, sensory feedback is a fundamental part of humans' interaction with the environment and such feedback is currently missing in the commercial interfaces. To this end, researchers have been investigating different technologies to improve human and machine interactions through machine-to brain interfaces (MBIs), paving the way to a new generation of interfaces with closed-loop capabilities.

The goal of this workshop is to discuss latest advances and challenges on the pathway to closed-loop brain-machine interfaces. Speakers will present research work and state-of-the-art, addressing the challenges of (i) real-time interfacing with the central and peripheral nervous system (ii) invasive and non-invasive somatosensory interfaces, (iii) closed-loop control of stimulation, and (iv) theoretical models and tools supporting translation efforts.

Agenda

- 1:00-1:05pm - Opening Remarks: Nitish Thakor (JHU)
- 1:05-1:30pm - Paul Sajda (Columbia): Closed-loop EEG-TMS for Personalized Treatment of Major Depressive Disorder.
- 1:30-1:55pm - Ning Lan (Shanghai Jiao Tong University): Developing a non-invasive somatosensory interface for prosthetic hand.
- 1:55-2:20pm - Madeleine Lowery (University College Dublin): Closed loop control of deep brain stimulation for Parkinson's disease.
- 2:20-2:45pm - Solaiman Shokur (EPFL): Partial sensory recovery in chronic complete SCI people trained with a non-invasive bidirectional BMI.
- 2:45-3:10pm - Lee Fisher (UPitt): Restoring sensation in the upper- and lower-limb using spinal cord stimulation.
- 3:10-3:35pm - Rahul Kaliki (IBT): TBD
- Rising stars Theme:
- 3:35-3:55pm - Ashley Dalrymple (CMU/Utah): Stentrode BCI trial and sensory restoration with invasive and non-invasive spinal cord stimulation.
- 3:55-4:25pm - Luke Osborn and Breanne Christie (APL): Enhanced Neural Interfacing and Sensory Stimulation
- 4:25-4:30pm - Synopsis (Nitish Thakor)
- 4:30-5:00pm - Q&A Session

Organizers

Dr. Mohsen Rakhshan (Johns Hopkins University)
Keqin "Catherine" Ding (Johns Hopkins University)
Dr. Andrei Dragomir (National University of Singapore)
Dr. Nitish V. Thakor (Johns Hopkins University)

Workshop - New Vistas on Brain Implants by Multi-Omics

Room 301

For many years now, implanted electrode arrays of different make and material are designed and used to record from and stimulate into the brain. Despite terrific progress, most of these implants do not find their way into truly longterm use, not to mentioned into standard clinical procedures. In order to investigate brain's complex response towards these foreign bodies neuroengineers have too long limited themselves to microscopy of brain tissue representing the implant's impact by a mere handful of markers.

Thankfully, during the last decades biology has experienced an 'omics' revolution revealing e.g. new vistas on reactive states in brain tissue and advancing our understanding of the underlying reactive networks. These exciting new approaches are now ready to be roped in for progressing our detailed understanding of brain's detrimental response to implants. Measuring levels of expressed RNA (*transcript-omics*) or proteins (*prote-omics*) with cellular resolution in relation to implant site has been shown to provide insights vastly exceeding neurotech's usual trinity of markers. The high-throughput, "hypothesis-free" nature of these characterizations makes way better use of employed animals (3R) and has produced extremely rich data sets revealing thousands of more markers responding to implants. All these -omics pieces tell stories of vast cascades and are opening up new avenues of interventions to finally bring brain implants to clinical fruition.

This workshop aims to share -omics first hand experiences, dos and dont's and lessons learned with interested audience to transform the single-colored implant characterization to high resolution multi-colored dimensions.

This workshop will be held in the afternoon of April 24.

Speakers

Ulrich Hofmann, University of Freiburg:

From three to thirty thousand: Getting the most out of precious animal models.

Erin Purcell, Michigan State University:

Seeing the forest for the trees: Network analysis of differentially expressed genes surrounding device

Jeff Capadona, Case Western Reserve University:

From the same old story to too much information: establishing multi-omic techniques to assess the microelectrode tissue interface

IEEE Brain Panel
Room 307-310

Guiding Responsible Neurotechnology Innovation: Opportunities and Challenges of Different Governance Mechanisms

Moderator and Contributors

Moderator:

- Laura Y. Cabrera – Chair, IEEE BRAIN Neuroethics Subcommittee

Contributors:

- Debra Mathews – John Hopkins, Berman Institute of Bioethics, Incoming INS president
- Anna Wexler – University of Pennsylvania, INS Outreach Committee member
- Jacob Robinson- Rice University, former IEEE BRAIN Neuroethics Subcommittee member
- Ricardo Chavarriaga-Chair, IEEE SA, Industry Connections group on Neurotechnologies for BMI

Rationale

Over the last decade, multiple efforts, both public and private, are underway to develop new tools to deepen our understanding of the brain and to create novel technologies that can record, decode, and sense brain signals as well as stimulate, modify, and augment brain function with improved efficacy and safety.

There have been a variety of undertakings focused on promoting the ethical development and use of neurotechnologies. However, implementation and uptake are still important barriers to fulfil the goals of such efforts. As part of IEEE's mission to support the neuroengineering community and foster the responsible development and use of neurotechnology, the IEEE SA has started work on a series of socio-technical standards focused on neurotechnology, beginning with the P7700 Recommended Practice for the Responsible Design and Development of Neurotechnologies.

Description

This 60-min panel session, a joint effort between IEEE BRAIN Neuroethics Subcommittee and the International Neuroethics Society, will discuss the opportunities and challenges of different neurotechnology governance mechanisms, including the role of soft-law mechanisms, legislative and regulatory action and policies, as well as the creation of socio-technical standards. In particular, the role that different mechanisms play in translation and implementation of neuroethical recommendations at different levels of implementation (local, national, international).

It will touch on lessons to be learnt or even partnerships to be sought from work on other emerging technologies governance efforts, such as Artificial Intelligence. The session aims to foster an interdisciplinary conversation with the audience on key areas or domains where different governance mechanisms can be most valuable for developers and regulators, as well as gaps in current efforts.

Tuesday Podium Talks

Room: 307-310

11:00 - 12:00

Podium Talk Session 1 - Transducers – actuating

Moderator: Jitendran Muthuswamy (Arizona State University)

Synaptrode: neural interface at the synapse level

Jasper Koen Timmerman (University of Leuven & NERF, Belgium)

Joris De Wit (VIB, Belgium)

Sebastian Haesler (VIB, Belgium)

Efficient Modeling and Calibration of Multi-Electrode Stimuli for Epiretinal Implants

Praful K Vasireddy (Stanford University, USA)

Alex R. Gogliettino (Stanford University, USA)

Jeff B Brown (Stanford University, USA)

Ramandeep Vilku (Stanford University, USA)

Sasidhar Madugula (Stanford University, USA)

Andrew J Phillips (Stanford University, USA)

Subhasish Mitra (Stanford University, USA)

Pawel Hottowy (AGH University of Science and Technology, Poland)

Alexander Sher (University of California, Santa Cruz, USA)

Alan Litke (University of California, Santa Cruz, USA)

Nishal P Shah (Stanford University, USA)

Eduardo J. Chichilnisky (Stanford University, USA)

Reconstruction of nerve functional topography using recruitment curves enables selective electrical stimulation

Simone Romeni (EPFL, Switzerland)

Bianca Ziliotto (Scuola Superiore Sant'Anna, Italy)

Nino Herve (EPFL, Switzerland)

Alice Giannotti (Scuola Superiore Sant'Anna, Italy)

Silvestro Micera (Scuola Superiore Sant'Anna, Italy & EPFL, Switzerland)

Regulation of arousal and performance of a healthy non-human primate using closed-loop central thalamic deep brain stimulation

Jonathan L Baker (Weill Cornell Medicine, USA)

Robert Toth (University of Oxford, United Kingdom)

Alceste Deli (University of Oxford, United Kingdom)

Mayela Zamora (IBME - University of Oxford, United Kingdom)

John E Fleming (University of Oxford, United Kingdom)

Moad Benjaber (University of Oxford, United Kingdom)

Dana Goerzen (Weill Cornell Medicine, USA)

Jae-Wook Ryou (Weill Cornell Medicine, USA)

Keith P Purpura (Weill Cornell Medicine, USA)

Nicholas D Schiff (Weill Cornell Medicine, USA)

Timothy Denison (University of Oxford, United Kingdom)

14:00 - 15:30

Podium Talk Session 2 - Novel sensing, image analysis, and data extraction

Moderator: Karin Wårdell (Linköpings University)

High-Quality 0.5mm Isotropic fMRI: Random Matrix Theory Meets Physics-Driven Deep Learning

Omer Burak Demirel (University of Minnesota & Center for Magnetic Resonance Research, USA)

Steen Moeller (University of Minnesota, USA)

Luca Vizioli (University of Minnesota, USA)

Ben Metcalfe (University of Bath, United Kingdom)

Automated Peripheral Nerve Geometric Mapping Using Temporal Interference Current Stimulation

Eleni Daskopoulou (Johns Hopkins University, USA)
Trevor Meyer (Johns Hopkins University, USA)
Michael T Williams (Johns Hopkins University, USA)
Pedro Irazoqui (Johns Hopkins University, USA)
Ryan Budde (Johns Hopkins University, USA)

Tuesday Poster Sessions

Tuesday, April 25, 10:15 – 11:00 & 13:00 – 14:00

Room: 314-317

Investigation of EEG Functional Connectivity Relationship with TMS Response in Mild Traumatic Brain Injury Patients

Mishal Z Hussain (Virginia Commonwealth University, USA)
Asif Jamil (Harvard Medical School, USA)
Laura M Franke (Virginia Commonwealth University, USA)
R Hadimani (Virginia Commonwealth University, USA)

Hybrid Transcranial Magnetic Stimulation and Deep Brain Stimulation in the Presence of an Implantable Pulse Generator

Aryan Mhaskar (Virginia Commonwealth University & Mills E. Godwin High School, USA)
Mohannad Tashli (Virginia Commonwealth University, USA)
Kathryn L Holloway (Virginia Commonwealth University, USA)
R Hadimani (Virginia Commonwealth University, USA)

Electrical stimulation evokes calcium waves in glial cells of degenerate rat retina

Steven T Walston (University of Southern California, USA)
Mark S Humayun (University of Southern California, USA)
Gianluca Lazzi (University of Southern California, USA)

Temporal interference stimulation evoked neural local field potential oscillations in vivo

Xiaoqi Zhu (Imperial College London & UK Dementia Research Institute, United Kingdom)
Jonathan Howard (Imperial College London & Invicro LLC, United Kingdom)
Zachary Bailey (Imperial College London, United Kingdom)
Marcia Garcia Garrido (Imperial College London, United Kingdom)
Adam Williamson (Aix-Marseille Université, France)
Rylie Green (Imperial College London, United Kingdom)
Eric Daniel Glowacki (Brno University of Technology, Czech Republic)
Nir Grossman (Imperial College London and UK Dementia Research Institute, United Kingdom)

Ultrasound induces the production of neuronal nitric oxide (NO) via mechanosensitive ion channels

Vlad Voziyanov (Arizona State University, USA)
Elliot Nester (Arizona State University, USA)
Arati Sridharan (Arizona State University, USA)
Bruce Towe (Arizona State University, USA)
Jit Muthuswamy (Arizona State University, USA)

Neural modeling

The Influence of Spatial Smoothing Kernel Size on ICA Model Order and Spatial Maps of Intrinsic Connectivity Networks

Behnaz Jarrahi (Stanford University, USA)

Novel Neural Microprobe with Adjustable Stiffness

Naser Sharafkhani (Deakin University, Australia)
John Long (Deakin University, Australia)
Scott Adams (Deakin University, Australia)
Abbas Z. Kouzani (Deakin University, Australia)

Neural Circuit Model of Long-Term Potentiation from Intermittent Theta Burst Stimulation

Neil Mittal (Virginia Commonwealth University, USA)
Yeajin Cho (Virginia Commonwealth University, USA)
Carrie Peterson (Virginia Commonwealth University, USA)

Simulating the Effects of Low Intensity Focused Ultrasound in Parkinson's Disease

Ítalo Karmann Aventura (University of Campinas, Brazil)
Marcelo Romano (University of Campinas, Brazil)
Leonardo Abdala Elias (University of Campinas, Brazil)

Computational Modeling of the LHB-VTA Pathway in Major Depression Disorder

Chenhao Bao (Johns Hopkins University, USA)
Meihong Zheng (Tsinghua University, China)

On the Relationship Between Fascicle Diameter and Perineurium Thickness in the Ulnar Nerve of Pigs

Felipe Rettore Andreis (Aalborg University, Denmark)
Benjamin W Metcalfe (University of Bath, United Kingdom)
Taha Al Muhammadee Janjua (Aalborg University & Lundbeck Pharmaceutical, Denmark)
Valéria Paula Sassoli Fazan (University of São Paulo, Brazil)
Winnie Jensen (Aalborg University, Denmark)
Suzan Meijs (Aalborg University, Denmark)
Thomas Gomes Nørgaard dos Santos Nielsen (Aalborg University, Denmark)

Repetitive Transcranial Magnetic Stimulation (rTMS) Current Pulse and Coil Size Optimization Using a Multi-Scale Modeling Toolbox

Shaghyegh Abbasi (University of Portland, USA)
Benjamin Joray (University of Portland, USA)
Kenneth Rudnicki (University of Portland, USA)
Vincent Leung (Baylor University, USA)
Peter Asbeck (UC San Diego, USA)
Milan Makale (UC San Diego, USA)

BGCN: An EEG-based Graphical Classification Method for Parkinson's Disease Diagnosis with Heuristic Functional Connectivity Speculation

Tian Lyu (National University of Singapore, Singapore)
Haotian Guo (National University of Singapore, Singapore)

Spatio-Temporal Analysis of LTP-like Neuroplasticity in Pigs

Mikkel B Danyar (Aalborg University, Denmark)
Hjalte F. Clark (Aalborg University, Denmark)
Nickolaj A. Atchuthan (Aalborg University, Denmark)
Lasse K. Daugbjerg (Aalborg University, Denmark)
Amalie K. Andersen (Aalborg University, Denmark)
Taha Al Muhammadee Janjua (Aalborg University & Lundbeck Pharmaceutical, Denmark)
Winnie Jensen (Aalborg University, Denmark)

Synchronization effects upon synapses in transcranial alternating current stimulation

Kyeongseop Park (Gwangju Institute of Science and Technology, Korea (South))
Hyeyeon Chung (Duke University, USA)
Cheolki Im (Gwangju Institute of Science and Technology, Korea (South))
Sung Chan Jun (Gwangju Institute of Science and Technology, Korea (South))

Computational modeling of the secondary rod pathway contribution to the retinal output

Laetitia Raison-Aubry (Université de Lorraine, CNRS, LORIA, France)
Loïs Naudin (LORIA CNRS, France)
Christophe P. Ribelayga (University of Houston, USA)
Laure Buhry (Université de Lorraine LORIA, France)

A roadmap to restore sexual dysfunction in the new Zealand white rabbit model

Ivo Strauss (University of Freiburg - Institute for Microtechnology (IMTEK), Germany)
Jonas Herbert Streckmann (University of Freiburg - Institute for Microtechnology (IMTEK), Germany)
Thomas Stieglitz (University of Freiburg, Germany)

Tuesday Poster Sessions

Tuesday, April 25, 10:15 – 11:00 & 13:00 – 14:00

Room: 314-317

Classifying Subjects with PFC Lesions from Healthy Controls during Working Memory Encoding via Graph Convolutional Networks

Sai Sanjay Balaji (University of Minnesota, USA)
Keshab K Parhi (University of Minnesota, USA)

Modeling current-distance effects on microstimulation sensitivity

Benjamin I Ferleger (University of Pennsylvania, USA)
Andrew G. Richardson (University of Pennsylvania, USA)

An anatomically and biophysically realistic rodent subthalamic nucleus neuron model

Hengji Chen (Duke University, USA)
M. Sohail Noor (Duke University, USA)
Clayton S. Bingham (Duke University, USA)
Cameron C. McIntyre (Cleveland College of Medicine, USA)

Effects of Phase-dependent Stimulation on Hippocampal Oscillations: A Computational Modeling Approach

Yousef Salimpour (Johns Hopkins School of Medicine, USA)
Hsin-Pei Lee (Johns Hopkins School of Medicine, USA)
Heba Sattar (Johns Hopkins School of Medicine, USA)
William Anderson (Johns Hopkins School of Medicine, USA)

Reconstruction of nerve functional topography using recruitment curves enables selective electrical stimulation

Simone Romeni (EPFL, Switzerland)
Bianca Ziliotto (Scuola Superiore Sant'Anna, Italy)
Nino Herve (EPFL, Switzerland)
Alice Giannotti (Scuola Superiore Sant'Anna, Italy)
Silvestro Micera (Scuola Superiore Sant'Anna, Italy & EPFL, Switzerland)

One-class classifier based on Riemannian Geometry Distances for Outlier Detection in Motor Imagery

Kyle Kilcrease (California State University, Fresno, USA)
Hubert Cecotti (California State University, Fresno, USA)

Neural Correlations across Mice during Spontaneous and Task-Related Behaviors

Daiyao Yi (University of Florida, USA)
Shreya Saxena (University of Florida, USA)

Modeling deep brain stimulation evoked responses with phase oscillator networks

Jonathan Realmuto (University of California, Riverside, USA)
Jessica Vidmark (University of California, Irvine, USA)
Terence Sanger (Children's Hospital of Orange Country and University of California, Irvine, USA)

Computational framework for in silico analysis of neural hyperactivity and loss of neural activity in a population of interconnected neurons

Vaibhav Dhyani (Indian Institute of Technology, Hyderabad, India)
Debasmita Saha (Indian Institute of Technology Hyderabad, India)
Kareenhalli V Venkatesh (Institute of Technology Bombay, India)
Lopamudra Giri (Indian Institute of Technology Hyderabad, India)

Identification of Switching Linear Dynamics in Distributed Neural Populations

Rodrigo Osuna-Orozco (University of Texas at Austin, USA)
Samantha R. Santacruz (University of Texas at Austin, USA)

Nonlinear System Identification of Tremors Dynamics: A Data-driven Approximation Using Koopman Operator Theory

Xiangming Xue (North Carolina State University, USA)
Ashwin Iyer (North Carolina State University, USA)
Daniel Roque (University of North Carolina at Chapel Hill, USA)
Nitin Sharma (North Carolina State University, USA)

Reverse engineering information processing in lateral amygdala during auditory tones

Gregory Glickert (University of Missouri, Columbia, USA)
Benjamin Latimer (University of Missouri, Columbia, USA)
Pankaj Sah (Queensland University, Australia)
Satish Nair (University of Missouri, Columbia, USA)

Microstate analysis of GABA_B and mGluR Mediated Modulation of Calcium Spiking in Hippocampal Neurons

Dipanjan Sehanobish (IIT Hyderabad, India)
Vaibhav Dhyani (IIT Hyderabad, India)
Suman Gare (IIT Hyderabad, India)
Debasmita Saha (IIT Hyderabad, India)
Kishalay Mitra (IIT Hyderabad, India)
Lopamudra Giri (IIT Hyderabad, India)

Inferring Pyramidal Neuron Morphology using EAP Data

Ziao Chen (University of Missouri, Columbia, USA)
Matthew Carroll (University of Missouri Columbia, USA)
Satish Nair (University of Missouri, Columbia, USA)

Machine-learning predictor of nerve fiber firing rate allows the automatic optimization of electrical stimulation protocols

Simone Romeni (EPFL, Switzerland)
Gabriele Marino (Scuola Superiore Sant'Anna, Italy)
Luca Pierantoni (Scuola Superiore Sant'Anna, Italy)
Sara Moccia (Scuola Superiore Sant'Anna, Italy)
Silvestro Micera (Scuola Superiore Sant'Anna, Italy & EPFL, Switzerland)

A Transfer Learning-based Model for Individualized Clustered Seizure Prediction using Intracranial EEG

Yurui Cao (University of Illinois at Urbana-Champaign, USA)
Krishnakant V Saboo (University of Illinois at Urbana-Champaign, USA)
Vaclav Kremen (Mayo Clinic, USA)
Vladimir Sladky (Mayo Clinic, USA)
Nicholas M Gregg (Mayo Clinic, USA)
Paul M Arnold (Carle Illinois College of Medicine, USA)
Suguna Pappu (Carle Illinois College of Medicine, USA)
Philippa J Karoly (University of Melbourne, Australia)
Dean R Freestone (Seer Medical Pty Ltd., Australia)
Mark J Cook (University of Melbourne, Australia)
Gregory Worrell (Mayo Clinic, USA)
Ravishankar Iyer (University of Illinois at Urbana-Champaign, USA)

Reduced Order Realistic Neuron Models for Network Simulations

David R. Fague (University of Missouri, Columbia, USA)
Julius Von Rautenfeld (University of Missouri Columbia, USA)
Satish Nair (University of Missouri, Columbia, USA)

Training changes the EEG complexity and connectivity during time estimation

Jiayuan Meng (Tianjin University, China)
Xiaoyu Li (Tianjin University, China)
Yingru Zhao (Tianjin University, China)
Minpeng Xu (Tianjin University, China)
Dong Ming (Tianjin University, China)

The Novel NIH Platform for Cloud-Based Collaborative, FAIR, and Sustainable Computational Neurosciences

Esra Neufeld (IT'IS Foundation, ETH Zurich, Switzerland)
Manuel Guidon (Zurich MedTech AG, Switzerland)
Nicolas Chavannes (IT'IS Foundation, ETH Zurich, Switzerland)
Niels Kuster (IT'IS Foundation, Switzerland)

Tuesday Poster Sessions

Tuesday, April 25, 10:15 – 11:00 & 13:00 – 14:00

Room: 314-317

Activation of inflammasomes and their effects on neuroinflammation at the microelectrode-tissue interface in intracortical implants

Melissa E Franklin (University of Miami, USA)
Cassie Bennett (University of Miami, USA)
Maelle Arboite (University of Miami, USA)
Anabel Alvarez-Ciara (University of Miami, USA)
Natalie Corrales (University of Miami, USA)
Jennifer Verdelus (University of Miami, USA)
W. Dalton Dietrich (University of Miami, USA)
Robert W Keane (University of Miami, USA)
Abhishek Prasad (University of Miami, USA)

Virtual Resections: How Dynamic Network Brain Models May Improve EZ Surgery Outcome in Drug- Resistant Epileptic Patients

Luis A Sanchez (Johns Hopkins University, USA)
Patrick E Myers (Johns Hopkins University, USA)
Amir Hossein Daraie (Johns Hopkins University, USA)
Kristin Gunnarsdottir (Johns Hopkins University, USA)
Joon Kang (Johns Hopkins University, USA)
Jorge Gonzalez (UPMC, USA)
Sridevi Sarma (Johns Hopkins University, USA)

Assessment of the Safety of Electrical Stimulation of Peripheral Nerves through Computational Modeling

Jinze Du (University of Southern California, USA)
Andres W. Morales (University of Southern California, USA)
Pragya Kosta (University of Southern California, USA)
Jean-Marie Charles Bouteiller (University of Southern California, USA)
Gianluca Lazzi (University of Southern California, USA)

Pipeline for personalized physico-physiological modeling of brain stimulation therapies

Taylor Newton (Foundation for Research on Information Technologies in Society (IT^{IS}), Switzerland)
Fariba Karimi (Foundation for Research on Information Technologies in Society (IT^{IS}), Switzerland)
Melanie Steiner (Foundation for Research on Information Technologies in Society (IT^{IS}), Switzerland)
Esra Neufeld (Foundation for Research on Information Technologies in Society (IT^{IS}), Switzerland)
Bryn Lloyd (Foundation for Research on Information Technologies in Society (IT^{IS}), Switzerland)
Antonino Mario Cassara (Foundation for Research on Information Technologies in Society (IT^{IS}), Switzerland)
Niels Kuster (Foundation for Research on Information Technologies in Society (IT^{IS}); ETH Zurich, Switzerland)

Interictal Intracranial EEG Single-Pulse Electrical Stimulation and Virtual Stimulation Comparison for Epileptogenic Zone Localization

Sophia Zhai (Johns Hopkins University, USA)
Rachel J. Smith (University of Alabama at Birmingham, USA)
Kristin Gunnarsdottir (Johns Hopkins University, USA)
Daniel Ehrens (Stanford University, USA)
Adam Li (Columbia University, USA)
Jorge Gonzalez-Martinez (University of Pittsburgh Medical Center, USA)
Sridevi Sarma (Johns Hopkins University, USA)

A Model of Spinal Cord Stimulation During Arm Movement Post-Stroke

Omar Refy (Carnegie Mellon University, USA)
Hazel Cline (Carnegie Mellon University, USA)
Luigi Borda (Carnegie Mellon University, USA)
Genis Prat Ortega (University of Pittsburgh, USA)
Josep-Maria Balaguer (University of Pittsburgh, USA)
Elle Brough (Carnegie Mellon University, USA)
Marc P Powell (Reach Neuro Inc., USA)
Erynn Sorensen (University of Pittsburgh & Rehab Neural Engineering Labs, USA)
Nikhil Verma (Carnegie Mellon University, USA)
Erick Carranza (University of Pittsburgh, USA)
Elvira Pirondini (University of Pittsburgh, USA)
John W Krakauer (Johns Hopkins University, USA)
Marco Capogrosso (University of Pittsburgh, USA)
Douglas J Weber (Carnegie Mellon University, USA)

A model of the maturation of sensory interactions: from cross-modal competition to facilitation in Autism

Melissa Monti (University of Bologna, Italy)
Sophie Molholm (Albert Einstein College of Medicine, USA)
Cristiano Cuppini (University of Bologna, Italy)

Optimization of targeting in bioelectronic medicine using the Generalized Activating Function: from neuroprosthetics to electroceuticals

Javier Garcia Ordonez (Zurich MedTech AG, Switzerland)
Esra Neufeld (IT^{IS} Foundation, Switzerland)
Morgane Burkhardt (IT^{IS} Foundation, Switzerland)
Taylor Newton (IT^{IS} Foundation, Switzerland)
Antonino Mario Cassara (IT^{IS} Foundation, Switzerland)
Niels Kuster (IT^{IS} Foundation, Switzerland)

Foreshadowing Maneuvers transmitted by a Tactile System affecting Motion Sickness

Benedikt Buchheit (Saarland University, Germany)
Elena Schneider (Saarland University, Germany)
Caroline Lehser (Saarland University, Germany)
Daniel J. Strauss (Saarland University, Germany)

Synchrony due to structural network changes in an STN-GPe model

Cathal McLoughlin (University College Dublin, Ireland)
Madeleine Lowery (University College Dublin, Ireland)

Biophysical model of retinal responses to multi-electrode stimulation

Ramandeep Vilku (Stanford University, USA)
Praful K Vasireddy (Stanford University, USA)
Alex R. Gogliettino (Stanford University, USA)
Pawel Hottowy (AGH University of Science and Technology, Poland)
Alexander Sher (University of California, Santa Cruz, USA)
Alan Litke (University of California, Santa Cruz, USA)
Subhasish Mitra (Stanford University, USA)
Eduardo J. Chichilnisky (Stanford University, USA)

Seizure prediction using source-sink nodal dynamics in the epileptic network

Amir Hossein Daraie (Johns Hopkins University, USA)
Luis A Sanchez (Johns Hopkins University, USA)
Kristin Gunnarsdottir (Johns Hopkins University, USA)
Joon Kang (Johns Hopkins University, USA)
Sridevi Sarma (Johns Hopkins University, USA)

Quantifying the Accuracy of Computational Models for Compound Nerve Action Potential Recordings

Edgar Pena (Duke University, USA)
Nicole A Pelot (Duke University, USA)
Warren Grill (Duke University, USA)

Tuesday Poster Sessions

Tuesday, April 25, 10:15 – 11:00 & 13:00 – 14:00

Room: 314-317

Model of vestibular implant stimulation in rhesus labyrinth estimates current spread to facial and cochlear nerves

Evan O Vesper (Johns Hopkins School of Medicine, USA)
Brian J Morris (Johns Hopkins University School of Medicine, USA)
Celia Fernandez Brillet (Johns Hopkins University, USA)
Abderrahmane Hedjoudje (Johns Hopkins University School of Medicine, USA)
Charles Della Santina (Johns Hopkins University School of Medicine, USA)

Towards Designing Memory Prosthesis by Electrical Stimulation of Dentate Gyrus through Multi-Scale Computational Modeling

Shayan Farzad (University of Southern California, USA)
Tianyuan Wei (University of Southern California, USA)
Pragya Kosta (University of Southern California, USA)
Jean-Marie Charles Bouteiller (University of Southern California, USA)
Ted William Berger (University of Southern California, USA)
Gianluca Lazzi (University of Southern California, USA)

Brain activity reconstruction from EEG using multivariate mode decomposition methods

Pablo Andres Munoz Gutierrez (Universidad del Quindio, Colombia)
Diego Fernando Ramirez (Universidad del Quindio, Colombia)
Juan Esteban Castano (Universidad del Quindio, Colombia)

Reconstruction of realistic entorhinal cortical axons using High-Resolution 3d Serial Reconstruction of Thin Histological Sections

Tianyuan Wei (University of Southern California, USA)
Shayan Farzad (University of Southern California, USA)
Pragya Kosta (University of Southern California, USA)
Gene Yu (University of Southern California, USA)
Jean-Marie Charles Bouteiller (University of Southern California, USA)
Ted William Berger (University of Southern California, USA)
Gianluca Lazzi (University of Southern California, USA)

Individualized Brain Modeling with Noninvasive Stimulation For Neurocontrol Engineering

Matthew F Singh (Washington University in St. Louis, USA)
Jacob M Wheelock (Washington University in St. Louis, USA)
ShiNung Ching (Washington University in St. Louis, USA)
Todd Braver (Washington University in St. Louis, USA)

Neural correlates of dynamic cognitive control states

Daniel B Dorman (Johns Hopkins University, USA)
Aaron L. Sampson (Johns Hopkins University, USA)
Pierre Sacré (University of Liège, Belgium)
Veit Stuphorn (Johns Hopkins University, USA)
Ernst Niebur (Johns Hopkins University, USA)
Sridevi Sarma (Johns Hopkins University, USA)

Simulation and Visualization Tools for Deep Brain Stimulation Research Data

Teresa Nordin (Linköping University, Sweden)
Dorian Vogel (University of Applied Sciences and Arts Northwestern Switzerland, Switzerland)
Simone Hemm-Ode (University of Applied Sciences Northwestern Switzerland & School of Life Sciences, Switzerland)
Karin Wårdell (Linköping University, Sweden)

A Computational Model of Sacral Nerve Stimulation for the Treatment of Overactive Bladder

Daniel P Marshall (Duke University, USA)
Warren Grill (Duke University, USA)

Mechanical Properties of In Vivo Brain Tissue Determined Using Penetrating Microindentation

Arati Sridharan (Arizona State University, USA)
Leela Raj-Sankar (Arizona State University, USA)
Jit Muthuswamy (Arizona State University, USA)

Novel information extraction from traditional imaging modalities

Resting State Neurophysiology of Agonist Antagonist Myoneural Interface in Transtibial Amputees

Laura A Chicos (MIT Media Lab & MIT, USA)
D Rangaprakash (Massachusetts General Hospital, USA)
Robert L Barry (Massachusetts General Hospital, USA)
Hugh Herr (MIT-Harvard, USA)

Adversarial Debiasing techniques towards 'fair' skin lesion classification

Ramon L Correa-medero (Arizona State University & Mayo Clinic, USA)
Imon Banerjee (Mayo Clinic Arizona, USA)
Bhavik Patel (Mayo Clinic Arizona, USA)

Epileptogenic zone classification with functional connectivity and graph measures

Bruna M Carlos (University of Campinas, Brazil)
Brunno M Campos (University of Campinas, Brazil)
Marina K M Alvim (University of Campinas, Brazil)
Manuel G Patiño (University of Campinas, Brazil)
Fernando Cendes (University of Campinas, Brazil)
Gabriela Castellano (University of Campinas - UNICAMP & Institute of Physics Gleb Wataghin, Brazil)

Quantifying changes in local basal ganglia structural connectivity in the 6-hydroxydopamine model of Parkinson's Disease using correlational tractography

Mikhail Moshchin (University of Wisconsin-Madison, USA)
Kevin Cheng (University of Wisconsin-Madison, USA)
Susan Osting (University of Wisconsin-Madison, USA)
Matthew Laluzerne (University of Wisconsin-Madison, USA)
Samuel A Hurley (University of Wisconsin-Madison, USA)
Ajay P Singh (University of Wisconsin-Madison, USA)
James Trevathan (University of Wisconsin-Madison, USA)
Andrea Brzezczkowski (University of Wisconsin-Madison, USA)
John-Paul J Yu (University of Wisconsin-Madison, USA)
Wendell B Lake (University of Wisconsin-Madison, USA)
Kip A Ludwig (University of Wisconsin-Madison, USA)
Aaron J Suminski (University of Wisconsin-Madison, USA)

Timescales of the posterior parietal cortex during locomotor adaptation

Noelle A. Jacobsen (Graduate Research Assistant, USA)
John C Prieschl (University of Florida, USA)
Daniel P. Ferris (University of Florida, USA)

Phase-Amplitude Coupling Between EEG Cortical Oscillations and Respiration: An Exploratory Study

John McLinden (University of Rhode Island, USA)
Seyyed Bahram Borgheai (Emory University, USA)
Chetan Kumar (University of Massachusetts Dartmouth, USA)
Neela Rahimi (University of Massachusetts Dartmouth, USA)
Ming Shao (University of Massachusetts Dartmouth, USA)
Kevin Spencer (VA Boston Healthcare System and Harvard Medical School, USA)
Yalda Shahriari (University of Rhode Island, USA)

A Patient-specific Preplanning Treatment Algorithm for Focused Ultrasound Therapy of Spinal Cord Injury

Avisha Kumar (Johns Hopkins University, USA)
Kelley M K Leadingham (Johns Hopkins University, USA)
Max J Kerensky (Johns Hopkins University, USA)
Nicholas Theodore (Johns Hopkins University, USA)
Nitish Thakor (Johns Hopkins University & Singapore Institute for Neurotechnology (SINAPSE), USA)
Amir Manbachi (Johns Hopkins University, USA)

Tuesday Poster Sessions

Tuesday, April 25, 10:15 – 11:00 & 13:00 – 14:00

Room: 314-317

Automated Sleep Staging on Wearable EEG Enables Sleep Analysis at Scale

Maurice Abou Jaoude (Interaxon Inc., Canada)
Aravind Ravi (University of Waterloo, Canada)
Jiansheng Niu (Interaxon Inc., Canada)
Hubert Jacob Banville (Interaxon Inc., Canada)
Nicolas Florez Torres (Interaxon Inc., Canada)
Christopher Allen Aimone (Interaxon Inc., Canada)

The analysis of electroneurographic and electromyographic activity recorded in the medial nerve of a transhumeral amputee during phantom finger movements

Gurgen Soghoian (Skolkovo Institute of Science and Technology, Russia)
Artur Biktimirov (Far Eastern Federal University, Russia)
Nikita Piliugin (Skolkovo Institute of Science and Technology, Russia)
Yury Matvienko (Motorica LLC, Russia)
Ilya Chekh (Motorica LLC, Russia)
Mikhail Sintsov (Motorica LLC, Russia)
Mikhail Lebedev (Moscow State University, Russia)

Measurement of Single-Vessel Flow Parameters for Vascular Characterization of Spinal Cord Injury

Denis Routkevitch (Johns Hopkins University, USA)
Arjun K Menta (Johns Hopkins University, USA)
Nicholas Kats (Johns Hopkins University, USA)
Emily Baca (Johns Hopkins University, USA)
Zoe Soule (Johns Hopkins University, USA)
Kelley M K Leadingham (Johns Hopkins University, USA)
Andrew M. Hersh (Johns Hopkins University, USA)
Nicholas Theodore (Johns Hopkins University, USA)
Nitish Thakor (Johns Hopkins University & Singapore Institute for Neurotechnology (SINAPSE), USA)
Amir Manbachi (Johns Hopkins University, USA)

Tensor Decomposition of Large-scale Clinical EEGs Reveals Interpretable Patterns of Brain Physiology

Teja B Gupta (University of Illinois Urbana-Champaign, USA)
Neeraj Wagh (University of Illinois Urbana-Champaign, USA)
Samarth Rawal (University of Illinois Urbana-Champaign, USA)
Brent Berry (Mayo Clinic, USA)
Gregory Worrell (Mayo Clinic, USA)
Yogatheesan Varatharajah (University of Illinois Urbana-Champaign, USA)

Optical Phantoms for Calibrating a Novel Neuroimaging System Targeting Central Nervous System Fluid Flow Dynamics

Joseph P. Angelo (Johns Hopkins University Applied Physics Laboratory, USA)
William G Coon (Johns Hopkins University Applied Physics Laboratory, USA)
Matt Nagle (Johns Hopkins University Applied Physics Laboratory, USA)
Michael Fitch (Johns Hopkins University, USA)
Clara A Scholl (Johns Hopkins University Applied Physics Laboratory, USA)

Optimizing stimulation frequency for BCI-based color vision assessment: Preliminary results

James J. S. Norton (National Center for Adaptive Neurotechnologies, USA)
Ally Atkins (Union College, USA)
Hadi Habibzadeh (SUNY Albany, USA)
Theresa M. Vaughan (National Center for Adaptive Neurotechnologies, USA)

Observing brain most visited common band connectivity states from different fMRI resting state studies

Janerra Allen (University of Maryland Baltimore, USA)
Sravani Varanasi (University of Maryland Baltimore, USA)
Rong Chen (University of Maryland Baltimore, USA)
Elliot Hong (University of Maryland Baltimore, USA)
Fow-Sen Choa (University of Maryland Baltimore, USA)

Classification of Psychosis and Healthy EEG data using spectral features and multi-layer perception (MLP) networks

Sayan Ghosh (IIT Madras, India)
Srinivasa Chakravarthy (IIT Madras, India)
Muhammad A. Parvaz (ISOM Mount Sinai, USA)
Riaz B. Shaik (MSSM, USA)
Srinivasan Anantha Ramakrishnan (MSSM, USA)
Tamizharasan Kanagamani (IIT Madras, India)

Polar Coordinate Reconstruction for Circular Clustering with Neural Data

Xiaoxiao Sun (Columbia University, USA)
Paul Sajda (Columbia University, USA)

Uncovering Key Predictive Channels and Clinical Variables in the Gamma Band Auditory Steady-State Response in Early Stage Psychosis - a Longitudinal Study

Kristina M Holton (University of Delaware, USA)
Amy Higgins (McLean Hospital Harvard Medical School, USA)
Austin J Brockmeier (University of Delaware, USA)
Mei-Hua Hall (McLean Hospital Harvard Medical School, USA)

Cross Power Analysis of Motion Artifacts in in-Ear EEG Electrodes

Thomas V Dang (DCS Corporation, USA)
Mike W Nonte (DCS Corporation, USA)
Devin Adair (United States Army Research Laboratory, USA)
William David Hairston (United States Army Research Laboratory, USA)

Patch2Loc: Learning Representations to Localize MRI Patches for Abnormality Detection

Hassan Baker (University of Delaware, USA)
Austin J Brockmeier (University of Delaware, USA)

Myoelectric EEG artifact removal validation using tripolar concentric ring electrodes and canonical correlation analysis

Scott Phillips (Texas A&M University, USA)
Andrew D Nordin (Texas A&M University, USA)

P300 Fixation-Related Potential affected by Facial Emotion in Virtual Reality

Haorui Sun (University of Vermont, USA)
David Jangraw (University of Vermont, USA)

Visual Reaction Time Prediction in Stroke Patients with Spatial Neglect

Deniz Kocanaogullari (University of Pittsburgh, USA)
Jennifer Mak (University of Pittsburgh, USA)
Xiaofei Huang (Northeastern University, USA)
Emily Grattan (University of Pittsburgh, USA)
Sarah Ostadabbas (Northeastern University, USA)
George F Wittenberg (University of Pittsburgh, USA)
Murat Akcakaya (University of Pittsburgh, USA)

Labeling EEG Components with a Bag of Waveforms from Learned Dictionaries

Carlos Mendoza (University of Delaware, USA)
Austin Meek (University of Delaware, USA)
Austin J Brockmeier (University of Delaware, USA)

Tuesday Poster Sessions

Tuesday, April 25, 10:15 – 11:00 & 13:00 – 14:00

Room: 314-317

A Spatial-Temporal Graph Attention Network for Automated Detection and Width Estimation of Cortical Spreading Depression Using Scalp EEG

Han Yi Wang (The Chinese University of Hong Kong, Hong Kong)

Xujin Liu (New York University, USA)

Pulkit Grover (Carnegie Mellon University, USA)

Alireza Chaman Zar (Carnegie Mellon University, USA)

Dry organic electrodes for continuous in-ear EEG

Rylie Green (Imperial College London, United Kingdom)

Josef Goding (Imperial College London, United Kingdom)

Karina Litvinova (Imperial College London, United Kingdom)

Ella Boothman (Imperial College London, United Kingdom)

Neural oscillations during uneven terrain walking

Chang Liu (University of Florida, USA)

Ryan J. Downey (University of Florida, USA)

Jacob S Salminen (University of Florida, USA)

Daniel P. Ferris (University of Florida, USA)

Magnetic Resonance Fingerprint Segmentation of the Subthalamic Nucleus

Anna M Gann (Duke University, USA)

Cameron C McIntyre (Duke University, USA)

Dan Ma (Case Western Reserve University, USA)

Mark Griswold (Case Western Reserve University, USA)

Wednesday Poster Sessions

Wednesday, April 26, 10:00 – 11:00 & 13:00 – 14:00

Room: 314-317

Decoding and encoding algorithms

Shortened calibration of code-VEP based BCI by improved deep learning architecture and golden subjects pre-training

Ludovic Darnet (ISAE-Supaero, France)
Simon Ladouce (ISAE-Supaero, France)
Frédéric Dehais (ISAE-Supaero and Drexel University, France)

Long-term stable Electromyography classification using Canonical Correlation Analysis

Elisa Donati (University of Zurich and ETH Zurich, Switzerland)
Simone Benatti (University of Bologna, Italy)
Enea Ceolini (University of Zurich and ETH Zurich, Switzerland)
Giacomo Indiveri (University of Zurich and ETH Zurich, Switzerland)

Impacts of imagined lexical tone on Mandarin speech imagery BCI performance

Zengzhi Guo (Harbin Institute of Technology & Southern University of Science and Technology, China)
Hewen Zhang (Southern University of Science and Technology, China)
Fei Chen (Southern University of Science and Technology, China)

TUDAMatch: Time-Series Unsupervised Domain Adaptation for Automatic Sleep Staging

Yingying Luo (Beijing University of Posts and Telecommunications, China)
Yubo Zheng (Beijing University of Posts and Telecommunications, China)
Hengyi Shao (Beijing University of Posts and Telecommunications, China)
Lin Zhang (Beijing University of Posts and Telecommunications, China)
Lei Li (Beijing University of Posts and Telecommunications, China)

A Biologically Plausible Spiking Neural Network for Decoding Kinematics in the Hippocampus and Premotor Cortex

Elijah Taeckens (University of Maryland, USA)
Ryan Dong (University of Maryland, USA)
Sahil Shah (University of Maryland, USA)

Toward Robust High-Density EMG Pattern Recognition using Generative Adversarial Network and Convolutional Neural Network

Zhenyu Lin (San Francisco State University, USA)
Philip Liang (San Francisco State University, USA)
Xiaorong Zhang (San Francisco State University, USA)
Zhuwei Qin (San Francisco State University, USA)

Identifying Artistic Expertise Difference in Emotion Recognition in Response to Oil Paintings

Yu-Ting Lan (Shanghai Jiao Tong University, China)
Ze-Chen Li (Shanghai Jiao Tong University, China)
Dan Peng (Shanghai Jiao Tong University, China)
Wei-Long Zheng (Shanghai Jiao Tong University, China)
Bao-Liang Lu (Shanghai Jiao Tong University, China)

Sample Reweighting for Label Denoising of Neural Activity Data

Rong Chen (University of Maryland, Baltimore, USA)
Dongfang Xu (University of Maryland, Baltimore, USA)

Spiking Neural Network with Backpropagation Learning for Brain Visual Dynamics Decoding

Jake Stauffer (Purdue University, USA)
Qingxue Zhang (Purdue University, USA)

Hand gesture decoding using ultra-high-density EEG

Leonhard Schreiner (Gtec Medical Engineering GmbH & Johannes Kepler University Linz, Austria)
Sebastian Sieghartsleitner (Gtec Medical Engineering GmbH, Austria)
Katrin Mayr (Guger Technologies OG, Austria)
Harald Pretl (Johannes Kepler Universität, Austria)
Christoph Guger (Guger Technologies OEG, Austria)

Application of EEG-based passive mental fatigue detection model to an active fatigue task

Ling Guo (Institute for Infocomm Research, Singapore)
Wenfei Fang (Institute for Infocomm Research, Singapore)
Chuanchu Wang (Institute for Infocomm Research, Singapore)
Zhuo Zhang (Institute for Infocomm Research, Singapore)
Kai Keng Ang (Institute for Infocomm Research, Singapore)

Privacy-Preserving Motor Intent Classification via Feature Disentanglement

Jiahao Fan (Penn State University, USA)
Xiaogang Hu (Penn State University, USA)

Classification of upper limb impairment in acute stroke patients using resting-state EEG markers and machine learning

Michael Lassi (Scuola Superiore Sant'Anna, Italy)
Andrea Bandini (Scuola Superiore Sant'Anna, Italy)
Vincenzo Spina (University Hospital of Pisa, Italy)
Valentina Azzollini (University Hospital of Pisa, Italy)
Stefania Dalise (University Hospital of Pisa, Italy)
Alberto Mazzoni (Scuola Superiore Sant'Anna, Italy)
Carmelo Chisari (University Hospital of Pisa, Italy)
Silvestro Micera (Scuola Superiore Sant'Anna, Italy & EPFL, Switzerland)

Learning signatures of decision making from many individuals playing the same game

Michael J Mendelson (Georgia Institute of Technology, USA)
Mehdi Azabou (Georgia Institute of Technology, USA)
Suma Jacob (University of Minnesota, USA)
Nicola Grissom (University of Minnesota, USA)
David P Darrow (University of Minnesota, USA)
Becket Ebitz (Université de Montréal, USA)
Alexander Herman (University of Minnesota, USA)
Eva L Dyer (Georgia Institute of Technology, USA)

Assessing Temporal Variability in Fixation-Locked P300 Responses during Free-Viewing Visual Search

Stephen M Gordon (DCS Corporation, USA)
Vernon J Lawhern (DEVCOM Army Research Laboratory, USA)
Jonathan Touryan (DEVCOM Army Research Laboratory, USA)

EEG-Eye Movements Cross-Modal Decision Confidence Measurement with Generative Adversarial Networks

Cheng Fei (Shanghai Jiao Tong University, China)
Rui Li (Shanghai Jiao Tong University, China)
Liming Zhao (Shanghai Jiao Tong University, China)
Wei-Long Zheng (Shanghai Jiao Tong University, China)
Bao-Liang Lu (Shanghai Jiao Tong University, China)

Discrimination of Overt, Mouthed, and Imagined Speech Activity using Stereotactic EEG

Pedram Zanganeh Soroush (Virginia Commonwealth University, USA)
Sam Y. Cole (Virginia Commonwealth University, USA)
Christian Herff (University of Maastricht, The Netherlands)
Stephanie K. Ries (San Diego State University, USA)
Jerry J. Shih (UCSD Health, USA)
Tanja Schultz (University of Bremen, Germany)
Dean Krusienski (Virginia Commonwealth University, USA)

Wednesday Poster Sessions

Wednesday, April 26, 10:00 – 11:00 & 13:00 – 14:00

Room: 314-317

Optimal sensor set for decoding motor imagery from EEG

Arnau Dillen (MFYS, VUB, Belgium and ETIS, CY Paris, France)
Fakhreddine Ghaffari (ETIS, CY Paris, France)
Olivier Romain (ETIS, CY Paris, France)
Bram Vanderborcht (R&MM, VUB and IMEC, Belgium)
Romain Meeusen (MFYS, VUB, Belgium)
Bart Roelands (MFYS, VUB, Belgium)
Kevin De Pauw (MFYS, VUB, Belgium)

Detecting change points in neural population activity with contrastive metric learning

Carolina Urzay (Georgia Institute of Technology, USA)
Nauman Ahad (Georgia Institute of Technology, USA)
Mehdi Azabou (Georgia Institute of Technology, USA)
Aidan Schneider (Washington University in St. Louis, USA)
Geethika Atamkuri (Georgia Institute of Technology, USA)
Keith B. Hengen (Washington University in St. Louis, USA)
Eva L. Dyer (Georgia Institute of Technology, USA)

Combining Density based and Linear Discriminant Approaches for Motor Imagery Classification

Hubert Cecotti (California State University, Fresno, USA)

Riemannian geometry-based detection of slow cortical potentials during movement preparation

Frigyés S. Racz (The University of Texas at Austin, USA)
Rawan Fakhreddine (The University of Texas at Austin, USA)
Satyam Kumar (The University of Texas at Austin, USA)
José del R. Millán (The University of Texas at Austin, USA)

Wearable EEG-Based Classification of Odor-Induced Emotion

Oranath Chaichanasittikarn (National University of Singapore, Singapore)
Mengting Jiang (National University of Singapore, Singapore)
Manuel Seet (National University of Singapore, Singapore)
Mariana Saba (Procter and Gamble, Singapore)
Junji Hamano (Procter and Gamble, Singapore)
Andrei Dragomir (National University of Singapore, Singapore)

XAnet: Cross-Attention Between EEG of Left and Right Brain for Auditory Attention Decoding

Saurav Pahuja (University of Bremen, Germany)
Siqi Cai (National University of Singapore, Singapore)
Tanja Schultz (University of Bremen, Germany)
Haizhou Li (National University of Singapore, Singapore)

Adversarial Discriminative Domain Adaptation and Transformers for EEG-based Cross-Subject Emotion Recognition

Shadi Sartipi (University of Rochester, USA)
Müjdat Çetin (University of Rochester, USA)

On Transfer Learning for Naive Brain Computer Interface Users

Ruofan Liu (The University of Texas at Austin, USA)
Satyam Kumar (The University of Texas at Austin, USA)
Hussein Alawieh (The University of Texas at Austin, USA)
Evan Carnahan (The University of Texas at Austin, USA)
José del R. Millán (The University of Texas at Austin, USA)

A Self-supervised Task-agnostic Embedding for EEG Signals

Andisheh Partovi (University of Melbourne, Australia)
Anthony Burkitt (University of Melbourne, Australia)
David B. Grayden (University of Melbourne, Australia)

Partitioned Temporal Dithering for Efficient Epiretinal Electrical Stimulation

Amrith Lotlikar (Stanford University, USA)
Nishal P. Shah (Stanford University, USA)
Alex R. Gogliettino (Stanford University, USA)
Ramandeep Vilku (Stanford University, USA)
Sasidhar Madugula (Stanford University, USA)
Lauren Grosberg (Meta, USA)
Pawel Hottowy (AGH University of Science and Technology, Poland)
Alexander Sher (University of California, Santa Cruz, USA)
Alan Litke (University of California, Santa Cruz, USA)
Eduardo J. Chichilnisky (Stanford University, USA)
Subhasish Mitra (Stanford University, USA)

Assessing Ambiguity of Spike Detection By Thresholding

Anubhav Rakshit (University of Freiburg, Germany)
Ulrich Hofmann (Uniklinik Freiburg, Germany)
Sukru Okkesim (Freiburg Institute for Advanced Studies, Germany)

Automatic High-Frequency Oscillations Detection Using Time-Frequency Analysis

Ehsan Mirzakhilili (University of Pennsylvania, USA)
Christopher D. Adam (University of Pennsylvania, USA)
Alexandra V. Ulyanova (University of Pennsylvania, USA)
Victoria E. Johnson (University of Pennsylvania, USA)
John A. Wolf (University of Pennsylvania, USA)

Optimizing Neuromorphic Spike Encoding of Dynamic Stimulus Signals Using Information Theory

Ahmad El Ferdaoussi (Université de Sherbrooke, Canada)
Jean Rouat (Université de Sherbrooke, Canada)
Eric Plourde (Université de Sherbrooke, Canada)

Subject Generalization in Neural Speech Decoding using Curriculum Learning

Debadatta Dash (University of Texas at Austin, USA)
Paul Ferrari (Helen DeVos Childrens Hospital, USA)
Abbas Babajani-Feremi (University of Florida, USA)
David Harwath (University of Texas at Austin, USA)
Amir Borna (Sandia National Laboratories, USA)
Jun Wang (University of Texas at Austin, USA)

A brain-computer typing interface using finger movements

Nishal P. Shah (Stanford University, USA)
Matthew S. Willsey (Stanford University, USA)
Nick Hahn (Stanford University, USA)
Foram Kamdar (Stanford University, USA)
Donald T. Avansino (Stanford University, USA)
Leigh R. Hochberg (Brown University, USA)
Krishna V. Shenoy (Stanford University and HHMI, USA)
Jaimie Henderson (Stanford University, USA)

Region-based conversion of neural activity across sessions

Woohyun Eum (University of Florida, USA)
Carlton Smith (Yale University, USA)
Shreya Saxena (University of Florida, USA)

Months-long high-performance fixed LSTM decoder for cursor control in human intracortical brain-computer interfaces

Thomas Hosman (Brown University, USA)
Tsam Kiu Pun (Brown University, USA)
John D. Simeral (Brown University, USA)
Leigh R. Hochberg (Brown University, USA)

Synthesizing Speech by Decoding Intracortical Neural Activity from Dorsal Motor Cortex

Maitreyee Wairagkar (University of California, Davis, USA)
Leigh R. Hochberg (Brown University, USA)
David M. Brandman (University of California, Davis, USA)
Sergey D. Stavisky (University of California, Davis, USA)

Wednesday Poster Sessions

Wednesday, April 26, 10:00 – 11:00 & 13:00 – 14:00

Room: 314-317

Single-Trial Detection in Rapid Serial Visual Presentation Task using the Lilac Chaser Visual Illusion

Steve James (California State University Fresno, USA)
Hubert Cecotti (California State University, Fresno, USA)

Averaged sparse local representation for the elimination of pseudo-HFOs from intracranial EEG recording in epilepsy

Behrang Fazli Besheli (University of Houston, USA)
Zhiyi Sha (University of Minnesota, USA)
Thomas R. Henry (University of Minnesota, USA)
Jay R. Gavvala (UT McGovern School of Medicine, USA)
Sameer A. Sheth (Baylor College of Medicine, USA)
Nuri F. Ince (University of Houston, USA)

Processing multimodal neural data and decoding neural dynamics using cross-modality inference

Mehrdad Ramezani (University of California San Diego, USA)
Xin Liu (University of California San Diego, USA)
Chi Ren (University of California San Diego, USA)
Takaki Komiyama (University of California San Diego, USA)
Duygu Kuzum (University of California, San Diego, USA)

A Subject-Adaptive Brain State Decoding model via Ensemble Transfer Learning

Fulin Wei (Beijing Normal University & The Engineering Research Center of Intelligent Technology and Educational Application, China)
Tianyuan Jia (Beijing Normal University, China)
Ziyu Li (Beijing Normal University, China)
Zhaodi Pei (Beijing Normal University, China)
Xia Wu (Beijing Normal University & The Engineering Research Center of Intelligent Technology and Educational Application, China)

Time-varying Mutual Information Analysis of Evoked in vivo Local Field Potentials in Rodents

Xiang Li (Carnegie Mellon University, USA)
Jay Reddy (Carnegie Mellon University, USA)
Vishal Jain (Carnegie Mellon University, USA)
Mats Forsell (Carnegie Mellon University, USA)
Pulkit Grover (Carnegie Mellon University, USA)
Maysam Chamanzar (Carnegie Mellon University, USA)

Using Automatic Speech Recognition to Measure the Intelligibility of Speech Synthesized from Brain Signals

Suvi Varshney (University of California, Davis, USA)
Sergey D Stavisky (University of California, Davis, USA)
Lee M Miller (University of California, Davis, USA)
David M Brandman (University of California, Davis, USA)
Dana R Farias (University of California, Davis, USA)

Identification of neural biomarkers of major depressive disorder symptom severity using computerized linguistic analysis

Daniela A Astudillo Maya (University of California, San Francisco, USA)
Kristin K Sellers (University of California, San Francisco, USA)
Noah Stapper (University of California, San Francisco, USA)
Ankit N Khambhati (University of California, San Francisco, USA)
Catherine Henderson (University of California, San Francisco, USA)
Joline Fan (University of California, San Francisco, USA)
Vikram R Rao (University of California, San Francisco, USA)
Katherine W Scangos (University of California, San Francisco, USA)
Edward F Chang (University of California, San Francisco, USA)
Andrew D Krystal (University of California, San Francisco, USA)

Construction of semi-supervised spatial projections to identify the source of beta- and high frequency oscillations in Parkinson's disease

Luciano R. F. Branco (University of Houston, USA)
Ashwin Viswanathan (Baylor College of Medicine, USA)
Arjun Tarakad (Baylor College of Medicine, USA)
Nuri F. Ince (University of Houston, USA)

Automatic Sleep Stage Classification with Cross-modal Self-supervised Features from Deep Brain Signals

Chen Gong (Tsinghua University, China)
Yue Chen (Tsinghua University, China)
Yanan Sui (Tsinghua University, China)
Luming Li (Tsinghua University, China)

Federated deep transfer learning for EEG decoding using multiple BCI tasks

Xiaoxi Wei (Imperial College London, United Kingdom)
Aldo Faisal (Imperial College London, United Kingdom)

Studying latent neuronal functional circuits underlying brain activity across task conditions

Noga Mudrik (Johns Hopkins University, USA)
Gal Mishne (University of California San Diego, USA)
Adam Charles (The Johns Hopkins University, USA)

MRGazerII: Camera-free Decoding Eye Movements from Functional Magnetic Resonance Imaging

Rongjie Hu (University of Science and Technology of China, China)
Jie Liang (University of Science and Technology of China, China)
Yiwen Ding (Anhui Medical University, China)
Shuang Jian (Anhui Medical University, China)
Xiuwen Wu (University of Science and Technology of China, China)
Yanming Wang (University of Science and Technology of China, China)
Yong Zhang (GE Healthcare, China)
Zhen Liang (Anhui Medical University, China)
Bensheng Qiu (University of Science and Technology of China, China)
Xiaoxiao Wang (University of Science and Technology of China, China)

Decoding of Motion Sickness based on EEG Signals using Deep Learning for Human Care

Kihee Park (Hyundai Mobis, Korea (South))
Yeong-Hun Park (Hyundai Mobis, Korea (South))
Chang Won Lee (Hyundai Mobis, Korea (South))
Jung-Hwan Kim (Hanyang University, Korea (South))
Chang-Hwan Im (Hanyang University, Korea (South))

Understanding how the vagus nerve conveys metabolic information from in vivo recordings

Amparo Güemes (University of Cambridge, United Kingdom)
Alejandro Carnicer-Lombarte (University of Cambridge, United Kingdom)
Sam Hilton (University of Cambridge, United Kingdom)
George Malliaras (University of Cambridge, United Kingdom)

Evaluating deep learning performance for P300 Speller BCI signal classification

Yashwanth V Ravipati (University of California, Los Angeles & Adlai E. Stevenson High School, USA)
Nader Pouratian (University of Texas Southwestern, USA)
Corey Arnold (University of California, Los Angeles, USA)
William Speier (University of California, Los Angeles, USA)

Simplicial Convolutional Layers for Decoding Head Direction and Grid Cell Data

Edward C. Mitchell (University of Tennessee Knoxville, USA)
Brittany Story (University of Tennessee Knoxville, USA)
Vasileios Maroulas (University of Tennessee Knoxville, USA)

Matching User and Machine Learning Rates in Co-Adaptive Closed-Loop Myoelectric Interfaces

Annika Pfister (Wellesley College, USA)
Maneeshika Madduri (University of Washington, USA)
Amber Chou (University of Washington, USA)
Sam Burden (University of Washington, USA)

Wednesday Poster Sessions

Wednesday, April 26, 10:00 – 11:00 & 13:00 – 14:00

Room: 314-317

Machine learning-based decoding of visual cortex response recorded with ECoG in a mouse

Daniela De Luca (Sant'Anna School of Advanced Studies, Italy)
Sara Moccia (Scuola Superiore Sant'Anna, Italy)
Raffaele Mazziotti (Scuola Normale Superiore, Italy)
Leonardo Lupori (Scuola Normale Superiore, Italy)
Tommaso Pizzorusso (Scuola Normale Superiore, Italy)
Silvestro Micera (Scuola Superiore Sant'Anna, Italy & EPFL, Switzerland)

Decoding Upsampled Limb Trajectories of a Running Mouse from Two-Photon Calcium Imaging Using a Recurrent Neural Network Encoder-Decoder

Seungbin Park (Purdue University, USA)
Megan Lipton (Purdue University, USA)
Maria Dadarlat (Purdue University, USA)

dPCA as a tool for low-dimensional BMI decoding

Luis H Cubillos (University of Michigan, USA)
Matthew J Mender (University of Michigan, USA)
Samuel R Nason-Tomaszewski (University of Michigan, USA)
Matthew S Willsey (University of Michigan, USA)
Nishant Ganesh Kumar (University of Michigan, USA)
Theodore A Kung (University of Michigan, USA)
Parag G Patil (University of Michigan, USA)
Cindy Chestek (University of Michigan, USA)
Chandramouli Krishnan (University of Michigan, USA)

In vivo Sensory and Motor Decoding with High-Density-Cortical Surface Electrodes

Elton Ho (Precision Neuroscience Corporation, USA)
Kazutaka Takahashi (Precision Neuroscience Corporation, USA)
Yoon Woo Byun (Precision Neuroscience Corporation, USA)
Mark Hettick (Precision Neuroscience Corporation, USA)
Daniel Trietsch (Precision Neuroscience Corporation, USA)
Kyle Reed (Precision Neuroscience Corporation, USA)
Mark Murphy (Precision Neuroscience Corporation, USA)
David Williams (Precision Neuroscience Corporation, USA)
Adam Poole (Precision Neuroscience Corporation, USA)
Morgan LaMarca (Precision Neuroscience Corporation, USA)
Manuel Monge (Precision Neuroscience Corporation, USA)
Demetrios Papageorgiou (Precision Neuroscience Corporation, USA)
Stephanie Rider (Precision Neuroscience Corporation, USA)
Kate Gelman (Precision Neuroscience Corporation, USA)
Ariana Dimock (Precision Neuroscience Corporation, USA)
Michael Mager (Precision Neuroscience Corporation, USA)
Craig Mermel (Precision Neuroscience Corporation, USA)
Benjamin Rapoport (Precision Neuroscience Corporation, USA)

Intelligent Compression Methods for Peripheral Nerve Recordings

Khaled Aboumerhi (Johns Hopkins University, USA)
Ralph Etienne-Cummings (Johns Hopkins University, USA)

Prediction of Electric Fields Induced by Transcranial Magnetic Stimulation in the Brain using a Deep Encoder-Decoder Convolutional Neural Network

Mohannad Tashli (Virginia Commonwealth University, USA)
Muhammad Sabbir Alam (Virginia Commonwealth University, USA)
Jiaying Gong (Virginia Polytechnic and State University, USA)
Connor J Lewis (Virginia Commonwealth University, USA)
Carrie Peterson (Virginia Commonwealth University, USA)
Hoda Eldardiry (Virginia Polytechnic and State University, USA)
Jayasimha Atulasimha (Virginia Commonwealth University, USA)
R Hadimani (Virginia Commonwealth University, USA)

Classification of the Linguistic Characteristics of Overt Speech with Deep Learning

Alexander R Craik (University of Houston, USA)
Heather Raye Dial (University of Houston, USA)
Jose L Contreras-Vidal (University of Houston, USA)

A shallow convolutional neural network for the classification of a multisensory P300 BCI

Xinbing Zhang (Penn State University, USA)
Andrea Stanisci (Penn State University, USA & Politecnico di Milano, Italy)
Hanel Watkins Eberly (Penn State University, USA)
Andrew Geronimo (Penn State University, USA)

Real-time wetness sensation for prosthetic users

Nerea Isabel Carbonell Munoz (EPFL, Switzerland)
Jonathan Muheim (EPFL, Switzerland)
Outman Akouissi (EPFL, Switzerland)
Rachel Monney (EPFL, Switzerland)
Amanda Felouzis (ETH, Switzerland)
Davide Filingeri (University of Southampton, Switzerland)
Silvestro Micera (Scuola Superiore Sant'Anna, Italy & EPFL, Switzerland)
Solaiman Shokur (École Polytechnique Fédérale de Lausanne, Switzerland)

Cross-experiment transfer learning for real-time brain computer interfaces

Nancy Ronquillo (Naval Information Warfare Command, USA)
Jeffrey Onners (Naval Information Warfare Center, USA)
Roger Sengphanith (Naval Information Warfare Center, USA)
Debra Houst (Naval Information Warfare Center, USA)
Benjamin Cichy (NIWC & NAVWAR, USA)
Cortney Bradford (Army Research Lab, USA)
Nicholas Wymbs (Naval Information Warfare Center, USA)

Decoding ERP Scalp Distribution

Roya Salehzadeh (The University of Alabama, USA)
Firat Soylu (The University of Alabama, USA)
Nader Jalili (The University of Alabama, USA)

Stimulation in Training Data Improves Compliance

Discrimination

Nathan Griffin (Elizabethtown College, USA)
Mark R Brinton (Elizabethtown College, USA)

Internal inputs to the NS

Two-Photon Targeted, Quad Whole-Cell Patch Clamping Robot

Gema I Vera Gonzalez (Imperial College London, United Kingdom)
Phatsimo O Kgwarae (Imperial College London, United Kingdom)
Simon Schultz (Imperial College London, United Kingdom)

Injectable Wireless Neuromuscular Microstimulators based on Electronic Rectification of Volume Conducted Currents

Antoni Ivorra (Principal Investigator, Spain)
Laura Becerra-Fajardo (Universitat Pompeu Fabra, Spain)
Albert Comerma (Postdoctoral Fellow, Spain)
Aracelys Garcia-Moreno (Universitat Pompeu Fabra, Spain)
Marc Tudela (Universitat Pompeu Fabra, Spain)
Jesus Minguillon (Postdoctoral Fellow, Spain)

Design and material related limitations of PDMS based, extraneural stimulation electrodes for safe applications

Vera Anna-Lea Oppelt (CorTec GmbH & Albert-Ludwigs-Universität Freiburg, Germany)
Joscha Hoffmann (Albert-Ludwigs-Universität Freiburg, Germany)
Martin Schuettler (University of Freiburg, Germany)
Thomas Stieglitz (University of Freiburg, Germany)

Wednesday Poster Sessions

Wednesday, April 26, 10:00 – 11:00 & 13:00 – 14:00

Room: 314-317

Reconfigurable Origami Probe for High-density, Multi-modal, and Three-dimensional Intracortical Sensing and Recording

Dongxiao Yan (University of Michigan & Paradromics Inc., USA)
Jose Roberto Lopez Ruiz (University of Michigan, USA)
Daeho Jeong (University of Michigan, USA)
Yi Tian (University of Michigan, USA)
Meng-Lin Hsieh (University of Michigan, USA)
Vittorino Lanzio (University of Michigan, USA)
Euisik Yoon (University of Michigan, USA)

Multimodal imaging and analysis

Graph-based Fusion of Imaging and Non-Imaging Data for Disease Trajectory Prediction

Amara Tariq (Mayo Clinic Arizona, USA)
Siyi Tang (Stanford University, USA)
Hifza Sakhi (Philadelphia College of Osteopathic Medicine - Georgia Campus, USA)
Leo Celi (Beth Israel Deaconess Medical Center, USA)
Janice Newsome (Emory University Healthcare Network, USA)
Daniel Rubin (Stanford University, USA)
Hari Trivedi (Emory University, USA)
Judy Gichoya (Emory University, USA)
Bhavik Patel (Mayo Clinic Arizona, USA)
Imon Banerjee (Mayo Clinic Arizona, USA)

Imaging circuit activity in the rat brain with fast neural EIT and depth arrays

Adam Fitchett (University College London, United Kingdom)
Jason Fabbri (Columbia University, United Kingdom)
Yaoming Hu (Columbia University, United Kingdom)
Justin Cange (Columbia University, United Kingdom)
Karolina Kozeniauskaitė (University College London, United Kingdom)
Jason Fabbri (Columbia University, United Kingdom)
David Holder (University College London, United Kingdom)
Kirill Aristovich (University College London, United Kingdom)

Impact of tip size and shape on the insertion force of implantable CMOS neural probes

Alberto Perna (Istituto Italiano di Tecnologia & The Open University, Italy)
Joao Felipe Ribeiro (Istituto Italiano di Tecnologia, Italy)
Gabor Orban (Istituto Italiano di Tecnologia, Italy)
Matteo Vincenzi (Istituto Italiano di Tecnologia, Italy)
Fabio Boi (Istituto Italiano di Tecnologia, Italy)
Gian Nicola Angotzi (Istituto Italiano di Tecnologia, Italy)
Luca Berdondini (Istituto Italiano di Tecnologia (IIT), Italy)

Fine-grained Emotion Recognition using Brain-Heart Interplay measurements and eXplainable Convolutional Neural Networks

Guido Gagliardi (University of Pisa & KU Leuven, Belgium)
Antonio Luca Alfeo (University of Pisa, Italy)
Vincenzo Catrambone (University of Pisa, Italy)
Mario Giovanni C.A. Cimino (University of Pisa, Italy)
Maarten De Vos (KU Leuven, Belgium)
Gaetano Valenza (University of Pisa, Italy)

The Feasibility of Fast Neural Magnetic Detection Electrical Impedance Tomography: A Modelling Study

Kai F Mason (University College London, United Kingdom)
Kirill Aristovich (University College London, United Kingdom)
David Holder (University College London, United Kingdom)

Medial Tractography Analysis (MeTA) for White Matter Population Analyses Across Datasets

Iyad Ba Gari (University of Southern California, USA)
Abhinaav Ramesh (University of Southern California, USA)
Shayan Javid (University of Southern California, USA)
Shruti P. Gadewar (University of Southern California, USA)
Elnaz Nouroollahimoghadam (University of Southern California, USA)
Sophia I. Thomopoulos (University of Southern California, USA)
Paul M. Thompson (University of Southern California, USA)
Talia M. Nir (University of Southern California, USA)
Neda Jahanshad (University of Southern California, USA)

Investigation of functional integration of cortical organoids transplanted in vivo towards future neural prosthetics applications

Madison Wilson (University of California, San Diego, USA)
Martin Thunemann (Boston University, USA)
Francesca Puppo (University of California, San Diego, USA)
Emily Martin (Boston University, USA)
Rebeca Blanch (University of California, San Diego, USA)
Fred Gage (The Salk Institute for Biological Sciences, USA)
Alysson Muotri (University of California, San Diego, USA)
Anna Devor (Boston University, USA)
Duygu Kuzum (University of California, San Diego, USA)

Population receptive field estimation in sub-bundles of the human optic radiation

Yanning Wang (University of Science and Technology of China, China)
Huan Wang (University of Science and Technology of China, China)
Benedictor Alexander Nguchu (University of Science and Technology of China, China)
Du Zhang (University of Science and Technology of China, China)
Xiaoxiao Wang (University of Science and Technology of China, China)
Bensheng Qiu (University of Science and Technology of China, China)

Developing a Non-Invasive Surrogate for Craniospinal Compliance Measurement

Fariba Karimi (ETH Zürich & IT'IS Foundation, Switzerland)
Esra Neufeld (IT'IS Foundation, Switzerland)
Arya Fallahi (Cisco, Switzerland)
Andrea Boraschi (University of Zurich, Switzerland)
Jaco J.M. Zwanenburg (University Medical Center Utrecht, The Netherlands)
Andreas Spiegelberg (University of Zurich, Switzerland)
Vartan Kurtcuoglu (University of Zurich, Switzerland)
Niels Kuster (IT'IS Foundation, Switzerland)

Next-Generation Michigan Optoelectrodes: Ultra-flexible micro-LED Probes for Chronic Optogenetic Brain Studies

Eunah Ko (University of Michigan, USA)
Mihály Vöröslakos (University of Michigan, USA)
Jose Roberto Lopez Ruiz (University of Michigan, USA)
Meng-Lin Hsieh (University of Michigan, USA)
Kensall Wise (University of Michigan, USA)
Euisik Yoon (University of Michigan, USA)

Anatomical and topographical characterization of the cardiac autonomic innervation for selective cardiac vagus nerve stimulation in pigs, rabbits, and humans

Bettina Kronsteiner (Center for Medical Physics and Biomedical Engineering & Medical University of Vienna, Austria)

Wednesday Poster Sessions

Wednesday, April 26, 10:00 – 11:00 & 13:00 – 14:00

Room: 314-317

Imaging slow neural activity in the rat brain using parallel Electrical Impedance Tomography (EIT)

Karolina Kozeniauskaitė (University College London, United Kingdom)
Adam Fitchett (University College London, United Kingdom)
Kai F Mason (University College London, United Kingdom)
Kirill Aristovich (University College London, United Kingdom)
David Holder (University College London, United Kingdom)

Learning from the Past: Probabilistic Deep Brain Stimulation Atlas Based on Intra-Operative Data

Dorian Vogel (University of Applied Sciences and Arts Northwestern Switzerland, Switzerland)
Karin Wårdell (Linköping University, Sweden)
Jérôme Coste (Clermont-Auvergne University, France)
Jean-Jacques Lemaire (CHU Clermont-Ferrand, Hôpital Gabriel Montpied, Clermont-Ferrand, France)
Simone Hemm-Ode (University of Applied Sciences Northwestern Switzerland & School of Life Sciences, Switzerland)

Feasibility of high-accuracy impedance tomography enabled by time-of-flight EIT (TOF-EIT)

Florencia Maurino Alperovich (University College London, United Kingdom)
Enrico Ravagli (University College London, United Kingdom)
David Holder (University College London, United Kingdom)
Kirill Aristovich (University College London, United Kingdom)

Real time EEG-fMRI slow wave phase prediction with a recurrent neural network

Joshua Levitt (Boston University, USA)
Zinong Yang (Boston University, USA)
Leandro P. L. Jacob (Boston University, USA)
Laura D Lewis (Boston University, USA)

Reduction of Gait-Synchronized Triboelectric Artifact in Mobile Electroencephalography

Mike W Nonte (DCS Corporation, USA)
Thomas V Dang (DCS Corporation, USA)
Devin Adair (United States Army Research Laboratory, USA)
William David Hairston (United States Army Research Laboratory, USA)

Adversary on Multimodal BCI-based Classification

Chetan Kumar (UMass Dartmouth, USA)
James Patrick Donohue (UMass Dartmouth, USA)
Rohan Gonjari (UMass Dartmouth, USA)
Neela Rahimi (UMass Dartmouth, USA)
John McLinden (University of Rhode Island, USA)
Yalda Shahriari (University of Rhode Island, USA)
Ming Shao (UMass Dartmouth, USA)

Microelectrodes for simultaneous recording of neural activity and oxygen tension in a 7 Tesla MRI

Livia de Mesquita Teixeira (Arizona State University, USA)
Yuka Sugamura (Arizona State University, USA)
Arati Sridharan (Arizona State University, USA)
Vikram Kodibagkar (Arizona State University, USA)
Jit Muthuswamy (Arizona State University, USA)

Neuroethics

Embedding Ethics into Neuroengineering Education: A Human-Centered Engineering Course on Neurorehabilitation

Nicolas Berberich (Technische Universität München & Institute for Cognitive Systems, Germany)
Natalia Paredes-Acuna (Technische Universität München & Institute for Cognitive Systems, Germany)
Benjamin Michael Lipp (Cornell University, USA)
Gordon Cheng (Technische Universität München, Germany)

Pre-clinical work to clinical

Development of a 3D Printing Strategy for Completely Polymeric Neural Interfaces Fabrication

Ciro Zinno (Scuola Superiore Sant'Anna, Italy)
Ilaria Cedrola (Scuola Superiore Sant'Anna, Italy)
Alice Giannotti (Scuola Superiore Sant'Anna, Italy)
Eugenio Redolfi Riva (Scuola Superiore Sant'Anna, Italy)
Silvestro Micera (Scuola Superiore Sant'Anna, Italy & EPFL, Switzerland)

Flexible Microelectrode Array for Chronic Electrocorticography Recording under Different Neurophysiological Conditions

Suman Chatterjee (Indian Institute of Science, Bangalore, India)
Rathin K. Joshi (Indian Institute of Science, Bangalore, India)
Shabari Girishan Kv (Indian Institute of Science, Bangalore, India)
Hardik J. Pandya (Indian Institute of Science, Bangalore, India)

Safe retrieval of a stent-based endovascular neural recording array

Venkata S Aditya Tarigoppula (Synchron Australia & The University of Melbourne, Australia)
Gil S Rind (Synchron Australia & The University of Melbourne, Australia)
Stephen M Ronayne (Synchron Australia & The University of Melbourne, Australia)
Andrew Stent (Gribbles Veterinary Pathology, Australia)
Calvin D Eiber (Synchron Australia & The University of Melbourne, Australia)
Thomas J Oxley (Synchron Australia & The University of Melbourne, Australia)
Nicholas L Opie (Synchron Australia & The University of Melbourne, Australia)

Direct bladder contraction by single and multi-electrode stimulation

Yifan Wang (University of Houston, USA)
Philippe Zimmern (The University of Texas Southwestern Medical Center, USA)
Mario I. Mario Romero-Ortega (University of Houston, USA)

Rodent Forelimb Model of Direct Neurotization for Improved Studies of Muscle Reinnervation and Prosthesis Control

Kiara N Quinn (Johns Hopkins University, USA)
Pierce L Perkins (Johns Hopkins University, USA)
Siyu Wang (Johns Hopkins University, USA)
Tom Harris (Johns Hopkins University, USA)
Shalika Subramanian (Johns Hopkins University, USA)
Connor Glass (Johns Hopkins University, USA)
Sami Tuffaha (Johns Hopkins University, USA)
Nitish Thakor (Johns Hopkins University & Singapore Institute for Neurotechnology (SINAPSE), USA)

Global classification of intentional movement across upper limb myoelectric pattern recognition-controlled prosthesis users

Zachary A. Wright (Coapt, LLC, USA)
Nathaniel Stambaugh (Coapt LLC & Dexter Southfield School, USA)

A comparative assessment of evoked compound action potentials measured by optrode and conventional bioamplifier systems

Reem Almasri (University of New South Wales, Australia)
Yuan Wei (University of New South Wales, Australia)
Francois Ladouceur (University of New South Wales, Australia)
Laura A Poole-Warren (University of New South Wales, Australia)
Nigel H. Lovell (University of New South Wales, Australia)
Amr Al Abed (University of New South Wales, Australia)

Wednesday Poster Sessions

Wednesday, April 26, 10:00 – 11:00 & 13:00 – 14:00

Room: 314-317

A Shared Resource for Building Polymer-Based Microelectrode Arrays as Neural Interfaces

Kee Scholten (University of Southern California & PIE Foundry, USA)
Huijing Xu (University of Southern California, USA)
Dong Song (University of Southern California, USA)
Ellis Meng (University of Southern California, USA)

Microcontroller Based Low Latency Audio System to Study Cortical Auditory Evoked Potentials: Applications with Intraoperative Language Mapping

Israt Tasnim (University of Houston, USA)
Priscella Asman (University of Houston, USA)
Chandra Prakash Swamy (University of Houston, USA)
Sudhakar Tummala (UT MD Anderson Cancer Center, USA)
Sujit Prabhu (UT MD Anderson Cancer Center, USA)
Nuri F. Ince (University of Houston, USA)

Introducing the Cleveland Open Source Modular Implant Innovators Community (COSMIC)

Kevin L. Kilgore (MetroHealth Medical Center, USA)
Brian Smith (Case Western Reserve University, USA)
Cynthia A Chestek (University of Michigan, USA)

Actively Multiplexed μ ECoG Array Based on Thin-Film Electronics for High-Resolution Brain Mapping

Horacio Londoño-Ramírez (KU Leuven & IMEC, Belgium)
Xiaohua Huang (KU Leuven, Belgium)
Jordi Cools (Thermo Fisher Scientific, Belgium)
Anna Chrzanowska (KU Leuven, Belgium)
Paoline Coulson (KU Leuven & IMEC, Belgium)
Clément Brunner (KU Leuven, Belgium)
Marco Ballini (IMEC & Now at TDK InvenSense, Italy)
Nick Van Helleputte (IMEC, Belgium)
Carolina Mora Lopez (IMEC, Belgium)
Jan Genoe (IMEC, Belgium)
Sebastian Haesler (VIB, Belgium)

Sterilization of MXene-Based Electrode Arrays

Doris Xu (University of Pennsylvania, USA)
Spencer Averbeck (University of Pennsylvania, USA)
Flavia Vitale (University of Pennsylvania, USA)

Translation of optical techniques for multimodal guidance and monitoring in neurosurgery

Karin Wårdell (Linköping University, Sweden)
Elisabeth Klint (Linköping University, Sweden)
Stina Mauritzon (Linköping University, Sweden)
Sofie Tapper (Linköping University, Sweden)

Modular Test Platform for Synchronized EMG and Motion Capture

Robert G Gloeb-McDonald (USA)
Alexis L Lowe (Johns Hopkins University, USA)
Nitish Thakor (Johns Hopkins University & Singapore Institute for Neurotechnology (SINAPSE), USA)

High Signal-to-Noise Ratio of Neural Interface in Muscle Graft of a Transected Nerve

Youngjun Cho (Robotics and Mechatronics Engineering & DGIST, Korea (South))
Sanghoon Lee (DGIST, Korea (South))

Recording Neural Signals Inside Regenerative Peripheral Nerve Interface (RPNI) by Reducing Stimulus Artifact and Ambient Noise

Heejae Shin (DGIST, Korea (South))
Sanghoon Lee (DGIST, Korea (South))

Flexible Electronics Based Scalable Multiplexed μ ECoG Arrays for High-Density Neural Recordings

Paoline Coulson (KU Leuven & IMEC, Belgium)
Horacio Londoño-Ramírez (KU Leuven & IMEC, Belgium)
Xiaohua Huang (KU Leuven, Belgium)
Sofie Luijten (Nerf, Belgium)
Marco Ballini (IMEC & Now at TDK InvenSense, Italy)
Carolina Mora Lopez (IMEC, Belgium)
Kris Myny (KU Leuven & IMEC, Belgium)
Jan Genoe (IMEC, Belgium)
Sebastian Haesler (VIB, Belgium)

Short-to-Medium Term Implantable Wireless Selective Vagus Nerve Stimulator

Edwards Rutkovskis (University College London, United Kingdom)
Enrico Ravagli (University College London, United Kingdom)
Ahmad Shah Idil (University College London, United Kingdom)
David Holder (University College London, United Kingdom)
Henry Lancashire (University College London, United Kingdom)
Kirill Aristovich (University College London, United Kingdom)
Justin Perkins (Royal Veterinary College London, United Kingdom)
Jeffrey Ardell (The University of California Los Angeles, USA)

Cathodic Deep Brain Stimulation of the Subthalamic Nucleus Evokes Higher Cortical Potentials Compared to Anodic Stimulation

Seyyed Bahram Borgheai (Emory University, USA)
Enrico Opri (University of Michigan, USA)
Faical Faical Isbaine (Emory University, USA)
Jacob Rayyan (Emory University, USA)
Roohollah Jafari Deligani (Emory University, USA)
Nealen Laxpati (Emory University, USA)
Robert E. Gross (Emory University, USA)
Nicholas Au Yong (Emory University, USA)
Svetlana Miocinovic (Emory University, USA)

GABA Regulates Spinal Cord Stimulation Efficacy

Josep-Maria Balaguer (University of Pittsburgh, USA)
Lucy Liang (University of Pittsburgh, USA)
Jonathan Ho (University of Pittsburgh, USA)
Erinn Grigsby (University of Pittsburgh, USA)
Amr Mahrous (Northwestern University, USA)
Jorge Gonzalez-Martinez (University of Pittsburgh, USA)
Peter Gerszten (University of Pittsburgh, USA)
C J Heckman (Northwestern University, USA)
David Bennett (University of Alberta, Canada)
Elvira Pirondini (University of Pittsburgh, USA)
Marco Capogrosso (University of Pittsburgh, USA)

Clinical characterization of a wireless, high channel count, bidirectional somatosensory neuroprosthetic system

Sedona R Cady (Case Western Reserve University & Louis Stokes Cleveland VA Medical Center, USA)
Joris M Lambrecht (Case Western Reserve University & Louis Stokes Cleveland VA Medical Center, USA)
Karina T Dsouza (Case Western Reserve University & Louis Stokes Cleveland VA Medical Center, USA)
Jeremy L Dunning (Case Western Reserve University & Louis Stokes Cleveland VA Medical Center, USA)
James R Anderson (Louis Stokes Cleveland VA Medical Center & University Hospitals Cleveland Medical Center, USA)
Kevin J Malone (Louis Stokes Cleveland VA Medical Center & University Hospitals Cleveland Medical Center, USA)
Emily Graczyk (Case Western Reserve University & Louis Stokes Cleveland VA Medical Center, USA)
Dustin J Tyler (Case Western Reserve University & Louis Stokes Cleveland VA Medical Center, USA)

Wednesday Poster Sessions

Wednesday, April 26, 10:00 – 11:00 & 13:00 – 14:00

Room: 314-317

Using machine learning to guide the diagnosis and recovery of vestibular disorder patients through the analysis of therapeutic exercises

Lou Voinov (Johns Hopkins University, USA)

Omid A Zobeiri (Allen Institute, USA)

Kathleen E Cullen (Johns Hopkins University, USA)

Intraoperative Hand Tracking Method Based on Dual Optical Hand Tracking Sensors with Data Fusion

Yousef Salimpour (Johns Hopkins School of Medicine, USA)

Heba Sattar (Johns Hopkins School of Medicine, USA)

Hsin-Pei Lee (Johns Hopkins School of Medicine, USA)

Kelly Mills (Johns Hopkins School of Medicine, USA)

William Anderson (Johns Hopkins School of Medicine, USA)

Inter-Species Linear Scaling of Vagus Nerve Stimulation Parameters Fails to Achieve Consistent Nerve Responses

Eric Musselman (Duke University, USA)

Nikki Pelot (Duke University, USA)

Warren Grill (Duke University, USA)

High channel count polyimide μ ECOG: Design for usability, first-in-human recording, and electromagnetic interference mitigation

Travis L Massey (Lawrence Livermore National Laboratory, USA)

Kristin K Sellers (University of California, San Francisco, USA)

Matthew K Leonard (University of California, San Francisco, USA)

Edward F Chang (University of California, San Francisco, USA)

Razi-ul M Haque (Lawrence Livermore National Laboratory, USA)

Neural Activity within Solid Carcinomas: A technique to ascertain solid tumor malignancy

Jay R Shiralkar (Case Western Reserve University, USA)

Grant McCallum (Case Western Reserve University, USA)

Dominique Durand (Case Western Reserve University, USA)

Reinforcement learning in NER

Novel Reinforcement Learning Algorithm for Suppressing Synchronization in Closed Loop Deep Brain Stimulators

Harsh Agarwal (Indian Institute of Technology Jodhpur, India)

Heena Rathore (Texas State University, USA)

Primate Motor Cortical Activity Displays Hallmarks of a Temporal Difference Reinforcement Learning Process

Venkata S Aditya Tarigoppula (Synchron Australia & The University of Melbourne, Australia)

John S Choi (State University of New York Downstate Medical Centre, USA)

John P Hessburg (State University of New York Downstate Medical Centre, USA)

Brandi T Marsh (State University of New York Downstate Medical Centre, USA)

Joseph T Francis (University of Houston, USA)

Closed-Loop Reinforcement Learning Based Deep Brain Stimulation Using SpikerNet: A Computational Model

Brandon S Coventry (University of Wisconsin-Madison & Purdue University West Lafayette, USA)

Edward L Bartlett (Purdue University West Lafayette, USA)

Individual temporal and spatial dynamics of learning to control central Beta activity in neurofeedback training

Elmeri Syrjänen (Mälardalen University, Sweden)

Joana Silva (Mälardalen University, Sweden)

Elaine Astrand (Mälardalen University, Sweden)

Adaptive Bayesian Optimization for State-Dependent Brain Stimulation

Sina Dabiri (Emory University, USA)

Eric R Cole (Emory University & Georgia Tech, USA)

Robert E. Gross (Emory University, USA)

Towards AI-controlled FES-restoration of arm movements: neuromechanics-based reinforcement learning for 3-D reaching

Nat Wannawas (Imperial College London, United Kingdom)

Aldo Faisal (Imperial College London, United Kingdom)

Towards AI-controlled FES-restoration of arm movements: Controlling for progressive muscular fatigue with Gaussian state-space models

Nat Wannawas (Imperial College London, United Kingdom)

Aldo Faisal (Imperial College London, United Kingdom)

Neuromimetic Spiking Neuronal Networks Learn to Navigate Using a Suite of Biologically-Inspired Training Algorithms

Christopher T. Earl (University of Massachusetts Amherst & Nathan Kline Institute of Psychiatric Research, USA)

Hananel Hazan (Tufts University, USA)

Samuel A Neymotin (Nathan Kline Institute for Psychiatric Research & NYU School of Medicine, USA)

System for personalized inference of transcranial current stimulation waveforms

Jacob M Wheelock (Washington University in St. Louis, USA)

ShiNung Ching (Washington University in St. Louis, USA)

Matthew F Singh (Washington University in St. Louis, USA)

Evaluating Neural Strategies of Mouse Sensorimotor Control Using Deep Reinforcement Learning

Andrea Chacon (University of Florida, USA)

John Lazzari (Florida State University, USA)

Muhammad Noman Almani (University of Florida, USA)

Shreya Saxena (University of Florida, USA)

Complexity Synchronization in Adaptive Systems

Korosh Mahmoodi (University of North Texas, USA)

Paolo Grigolini (University of North Texas, USA)

Bruce J. West (University of North Texas, USA)

Influence of Extracellular Matrix-Mimicking Gel Electrolyte on Electrode Charge Injection

Thomas Niederhoffer (University College London, United Kingdom)

Anne Vanhoostenberghe (University College London, United Kingdom)

Henry Lancashire (University College London, United Kingdom)

Thursday Poster Sessions
Thursday, April 27, 10:00 – 11:00 & 13:00 – 14:00
Room: 314-317

Closing the loop in neural prostheses

Linear feedback control of spreading dynamics in stochastic nonlinear network models: epileptic seizures

S Amin Moosavi (Brown University, USA)
Wilson Truccolo (Brown University, USA)

EffiE: Efficient Convolutional Neural Network for Real-Time EMG Pattern Recognition System on Edge Devices

Jimmy Lu (Lowell High School, USA)
Philip Liang (San Francisco State University, USA)
Jin Chul Rhim (San Francisco State University, USA)
Xiaorong Zhang (San Francisco State University, USA)
Zhuwei Qin (San Francisco State University, USA)

Closed-Loop Control of Grasp Force with Biorealistic Hand Prosthesis

Zhuozhi Zhang (Shanghai Jiao Tong University, China)
Chih-Hong Chou (Shanghai Jiao Tong University, China)
Ning Lan (Shanghai Jiao Tong University, China)

Physiological Parameter Estimation for Dorsal Column Spinal Cord Stimulation

Andrew J Haddock (Boston Scientific Neuromodulation, USA)
Tianhe Zhang (Boston Scientific Neuromodulation, USA)
Rosana Esteller (Boston Scientific Neuromodulation, USA)

Freeform Stimulator (FS) Implant Design for Non-Pulsatile Arbitrary Waveform Neuromodulation

Alexandra Cheng (Johns Hopkins University, USA)
Paul Adkisson (Johns Hopkins University, USA)
Chaojun Cheng (Johns Hopkins University, USA)
Gene Fridman (Johns Hopkins University, USA)

A Bio-mimetic Neuromorphic Model for Heat-evoked Nociceptive Withdrawal Reflex in Upper Limb

Fengyi Wang (Technische Universität München, Germany)
Julio Rogelio Guadarrama Olvera (Technische Universität München, Germany)
Nitish Thakor (Johns Hopkins University & Singapore Institute for Neurotechnology (SINAPSE), USA)
Gordon Cheng (Technische Universität München, Germany)

A TinyML-based system for prosthetic control

Hancong Wu (University of Edinburgh, United Kingdom)
Kianoush Nazarpour (University of Edinburgh, United Kingdom)

Performance of basic vision tasks by people with Argus® II retinal prostheses

Breanne Christie (Johns Hopkins University Applied Physics Laboratory, USA)
Roksana Sadeghi (Johns Hopkins School of Medicine, USA)
Arathy Kartha (Johns Hopkins School of Medicine, USA)
Chigozie Ewulum (Johns Hopkins University Applied Physics Laboratory, USA)
Avi Caspi (Jerusalem College of Technology, Israel)
Francesco V. Tenore (Johns Hopkins University Applied Physics Laboratory, USA)
Roberta Klatzky (CMU, USA)
Gislin Dagnelie (Johns Hopkins University, USA)
Seth Billings (Johns Hopkins University Applied Physics Laboratory, USA)

On the in vitro long-term stability of thin-film stimulation contacts in polyimide-based neural interfaces

Paul Cvancara (University of Freiburg, Germany)
Inga Bartels (University of Freiburg, Germany)
Thomas Stieglitz (University of Freiburg, Germany)

Synaptrode: neural interface at the synapse level

Jasper Koen Timmerman (University of Leuven & NERF, Belgium)
Joris De Wit (VIB, Belgium)
Sebastian Haesler (VIB, Belgium)

Neurostimulation Perception Obeys Strength-Duration Curves and is Primarily Driven by Pulse Amplitude

Eric J Earley (Center for Bionics and Pain Research, Sweden & University of Colorado School of Medicine, USA)
Max Ortiz-Catalan (Chalmers University of Technology, Sweden)

Open Mind Neuromodulation Interface for the CorTec Brain Interchange (OMNI-BIC): an investigational distributed research platform for next-generation clinical neuromodulation research

Hanbin Cho (University of Washington, USA)
Jeffrey Ojemann (University of Washington, USA)
Jeffrey Herron (University of Washington, USA)

Carbon and metal microelectrodes for recording of epileptic High Frequency Oscillations: a comparative study

Gautier Daully (Université Rennes, France)

Iterative feedback tuning of proportional-integral controller parameters for adaptive deep brain stimulation

Jakub Orłowski (University College Dublin, Ireland)
Madeleine Lowery (University College Dublin, Ireland)

In vivo application of electrical rejuvenation pulses to chronically implanted neural macroelectrodes in nonhuman primates for regulation of interface properties

Kyle P O'Sullivan (University of Utah, USA)
Jonathan L Baker (Weill Cornell Medicine, USA)
Brian Philip (University of Utah, USA)
Mark E Orazem (University of Florida, USA)
Kevin Otto (University of Florida, USA)
Christopher R Butson (University of Florida, USA)

Semi-supervised adaptation of upper limb myoelectric pattern recognition prosthesis control through virtual gameplay

Andru Liu (Northwestern University, USA)
Matthew L. Elwin (Northwestern University, USA)
Zachary A. Wright (Coapt, LLC, USA)

Distributed Tactile Sensors for Palmar Surfaces of Prosthetic Hands

Hoang Truong (University of Colorado Boulder, USA)
Nikolaus Correll (University of Colorado Boulder, USA)
Jacob L. Segil (Rocky Mountain Regional VA Medical Center, USA)

Phase-Locked Noninvasive Brain Stimulation

Vojkan Mihajlovic (IMEC, The Netherlands)
Nicolo Rossetti (IMEC, The Netherlands)
Roberto Garcia van der Westen (IMEC, The Netherlands)

Design of a Novel, Low-Cost System for Neural Electrical Impedance Tomography

Zachary Nairac (Imperial College London, United Kingdom)
Timothy Constandinou (Imperial College London, United Kingdom)

Networks of Injectable Microdevices Powered and Digitally Linked by Volume Conduction for Neuroprosthetics: a Proof-of-Concept

Laura Becerra-Fajardo (Universitat Pompeu Fabra, Spain)
Jesus Minguillon (Postdoctoral Fellow, Spain)
Albert Comerma (Postdoctoral Fellow, Spain)
Antoni Ivorra (Principal Investigator, Spain)

Thursday Poster Sessions

Thursday, April 27, 10:00 – 11:00 & 13:00 – 14:00

Room: 314-317

Regulation of arousal and performance of a healthy non-human primate using closed-loop central thalamic deep brain stimulation

Jonathan L Baker (Weill Cornell Medicine, USA)
Robert Toth (University of Oxford, United Kingdom)
Alceste Deli (University of Oxford, United Kingdom)
Mayela Zamora (University of Oxford, United Kingdom)
John E Fleming (University of Oxford, United Kingdom)
Moaad Benjaber (University of Oxford, United Kingdom)
Dana Goerzen (Weill Cornell Medicine, USA)
Jae-Wook Ryou (Weill Cornell Medicine, USA)
Keith P Purpura (Weill Cornell Medicine, USA)
Nicholas D Schiff (Weill Cornell Medicine, USA)
Timothy Denison (University of Oxford, USA)

Waveform Development for Neurotransmitter Detection on Novel Boron-Doped Diamond Microelectrodes

Bhavna Gupta (Michigan State University, USA)
Mason L Perillo (Michigan State University, USA)
Isabelle E. Christensen (Michigan State University, USA)
James R. Siegenthaler (Fraunhofer Center Midwest, USA)
Robert Rechenberg (Fraunhofer Center Midwest, USA)
Michael F Becker (Fraunhofer Center Midwest, USA)
Wen Li (Michigan State University, USA)
Erin Purcell (Michigan State University, USA)

Model predictive control of a soft elbow exosuit reduces interaction torque

Nicholas Tacca (Technische Universität München, Germany)
John Nassour (Technische Universität München, Germany)
Gordon Cheng (Technische Universität München, Germany)

Edge AI-Based Closed-Loop Peripheral Nerve Stimulation System for Gait Rehabilitation after Spinal Cord Injury

Ahnsei Shon (Texas A&M University, USA)
Alex Stefanov (Texas A&M University, USA)
Michelle Hook (Texas A&M University, USA)
Hangue Park (Sunkyunkwan University & Texas A&M University (Adjunct), Korea (South))

The Design of Brainstem Interfaces: Characterisation of Physiological Artefacts and Implications for Closed-loop Algorithms

Alceste Deli (University of Oxford, United Kingdom)
Robert Toth (University of Oxford, United Kingdom)
Mayela Zamora (University of Oxford, United Kingdom)
Amir P Divanbeighi Zand (University of Oxford, United Kingdom)
Alexander L Green (University of Oxford, United Kingdom)
Timothy Denison (University of Oxford, United Kingdom)

Intraneural SiC multi electrodes to detect multimodal sensory signals

Maria A. Gonzalez-Gonzalez (University of Houston, USA)
Atefe Ghazavi (Duke University, USA)
Stuart Cogan (The University of Texas at Dallas, USA)
Mario I. Mario Romero-Ortega (University of Houston, USA)

Automated Tools to Improve Spinal Cord Injury Outcomes with Epidural Stimulation

Erik Johnson (Johns Hopkins University Applied Physics Laboratory, USA)
Jordan K Matelsky (Johns Hopkins University Applied Physics Laboratory, USA)
Christa Cooke (Johns Hopkins University Applied Physics Laboratory, USA)
Breanne Christie (Johns Hopkins University Applied Physics Laboratory, USA)
Khalid Jones (University of Louisville Kentucky Spinal Cord Research Center, USA)
Harley Ledbetter (University of Louisville, USA)
Siqi Wang (University of Louisville, USA)
Gail F. Forrest (Kessler Foundation, USA)
Nathan Torgerson (Medtronic, USA)
Claudia Angeli (University of Louisville, USA)
Susan Harkema (University of Louisville, USA)
Francesco V. Tenore (Johns Hopkins University Applied Physics Laboratory, USA)

Exploration of acute effects of stimulation frequency on subcallosal cingulate dynamics in SCC DBS

Elif Fitoz (Georgia Institute of Technology, USA)
Sankaraleengam Alagapan (Georgia Institute of Technology, USA)
Allison Waters (Icahn School of Medicine at Mount Sinai, USA)
Vineet Tiruvadi (Emory University, USA)
Ashan Veerakumar (Western University, USA)
Mosadoluwa Obatusin (Icahn School of Medicine at Mount Sinai, USA)
Ki Sueng Choi (Icahn School of Medicine at Mount Sinai, USA)
Andrea Crowell (Emory University, USA)
Patricio Riva-Posse (Emory University, USA)
Robert Butera (Georgia Institute of Technology, USA)
Helen Mayberg (Icahn School of Medicine at Mount Sinai, USA)
Christopher Rozell (Georgia Institute of Technology, USA)

Smart Dura: A monolithic optoelectrical surface array for neural interfacing with primate cortex

Sergio I Montalvo Vargo (Carnegie Mellon University, USA)
Tiphaine Belloir (University of Washington, USA)
Ibrahim Kimukin (Carnegie Mellon University, USA)
Zabir Ahmed (Carnegie Mellon University, USA)
Devon J Griggs (University of Washington, USA)
Noah Stanis (University of Washington, USA)
Azadeh Yazdan (University of Washington, USA)
Maysam Chamanzar (Carnegie Mellon University, USA)

Sensory and Motor Intent Signals Recorded by Regenerative Multielectrode Arrays

Kareem Hussein (University of Houston, USA)
Mario I. Mario Romero-Ortega (University of Houston, USA)

In-Home Video and IMU Kinematics of Self Guided Tasks Correlate with Clinical Bradykinesia Scores

Gabrielle Strandquist (University of Washington, USA)
Jeffrey Herron (University of Washington, USA)
Tanner Dixon (University of California San Francisco, USA)
Tomasz Frączek (University of Washington, USA)
Shravanan Ravi (University of California San Francisco, USA)
Alicia Zeng (University of California Berkeley, USA)
Raphael Bechtold (University of Washington, USA)
Daryl Lawrence (University of California Berkeley, USA)
Simon Little (University of California San Francisco, USA)
Jack Gallant (University of California Berkeley, USA)

Charge Injection Enhancement Comparisons of Iridium Oxide Microelectrodes In vitro and In vivo

Alpaslan Ersoz (Carnegie Mellon University, USA)
Insoo Kim (University of Connecticut, USA)
Martin Han (University of Connecticut, USA)

Thursday Poster Sessions

Thursday, April 27, 10:00 – 11:00 & 13:00 – 14:00

Room: 314-317

Motor Neuroprosthesis on Forelimb Function Recovery of Chronic Stroke Rats

Huan Gao (Zhejiang University, China)
Xiang Gao (Zhejiang University, China)
Kedi Xu (Zhejiang University, China)
Chang Wang (Zhejiang University, China)

An Automated Tactile Stimulator Apparatus for Neuromorphic Tactile Sensing

Zan Chaudhry (Johns Hopkins University, USA)
Fangjie Li (Johns Hopkins University, USA)
Mark Iskarous (Johns Hopkins University, USA)
Nitish Thakor (Johns Hopkins University & Singapore Institute for Neurotechnology (SINAPSE), USA)

Efficient Modeling and Calibration of Multi-Electrode Stimuli for Epiretinal Implants

Praful K Vasireddy (Stanford University, USA)
Alex R. Gogliettino (Stanford University, USA)
Jeff B Brown (Stanford University, USA)
Ramandeep Vilkhur (Stanford University, USA)
Sasidhar Madugula (Stanford University, USA)
Andrew J Phillips (Stanford University, USA)
Subhasish Mitra (Stanford University, USA)
Pawel Hottowy (AGH University of Science and Technology, Poland)
Alexander Sher (University of California, Santa Cruz, USA)
Alan Litke (University of California, Santa Cruz, USA)
Nishal P Shah (Stanford University, USA)
Eduardo J. Chichilnisky (Stanford University, USA)

A pilot study for active muscles decoding using functional near-infrared spectroscopy

Ruisen Huang (Chinese Academy of Sciences, China)
Fei Gao (Chinese Academy of Sciences, China)
Keum-Shik Hong (Pusan National University, Korea (South))

Patient-tailored closed-loop deep brain stimulation improves residual Parkinson's disease symptoms during at-home evaluation

Lauren H Hammer (University of California San Francisco, USA)
Stephanie Cerner (University of California San Francisco, USA)
Carina R Oehm (University of California San Francisco, USA)
Jiaang Yao (University of California San Francisco & University of California Berkeley, USA)
Maria Shcherbakova (University of California San Francisco, USA)
Amelia G Hahn (University of California San Francisco, USA)
Sarah S Wang (University of California San Francisco, USA)
Caroline A Racine (University of California San Francisco, USA)
Jill L Ostrem (University of California San Francisco, USA)
Clay N Smyth (University of California San Francisco & University of California Berkeley, USA)
Simon Little (University of California San Francisco, USA)
Philip A Starr (University of California San Francisco, USA)

Computational assessment of pig vagus nerve stimulation and compound action potential sensing towards closed-loop control

Joseph J Tharayil (Ecole Polytechnique Federale de Lausanne, Switzerland)
Silvia Farcito (IT'IS Foundation, Switzerland)
Antonino Mario Cassara (IT'IS Foundation, Switzerland)
Esra Neufeld (IT'IS Foundation, Switzerland)
Niels Kuster (IT'IS Foundation, Switzerland)

Closed-Loop Multimodal Neuromodulation of Vagus Nerve for Control of Heart Rate (Abstract)

Shane A Bender (Case Western Reserve University & MetroHealth Medical Center, USA)
David B Green (MetroHealth Medical Center, USA)
Kevin L. Kilgore (MetroHealth Medical Center, USA)
Niloy Bhadra (MetroHealth Medical Center, USA)
Tina L. Vrabec (MetroHealth Medical Center, USA)

Parylene-based flexible intrafascicular neural electrodes for neural signal recording of peripheral nerve

Wonsuk Choi (Korea Institute of Science and Technology & Korea University, Korea (South))
HyungDal Park (Korea Institute of Science and Technology & Yonsei University, Korea (South))
Seonghwan Oh (Korea Institute of Science and Technology & Korea University, Korea (South))
Sungsoo Kwak (Korea Institute of Science and Technology, Korea (South))
Joohee Kim (Korea Institute of Science and Technology, Korea (South))
Jinseok Kim (Korea Institute of Science and Technology, Korea (South))

Error-Related Potentials in Response to Haptic and Visual Disturbances to Exoskeleton Operation

Benjamin Kaplan (Technion - Israel Institute of Technology, Israel)
Miriam Zacksenhouse (Technion - Israel Institute of Technology, Israel)
Miri Benyamini (Technion - Israel Institute of Technology, Israel)

Switching to Synchronization: Optimizing the Robustness of Closed-Loop Vagus Nerve Stimulation for Heart Rate Control through Switching

Max Haberbusch (Medical University of Vienna, Austria)
Francesco Moscato (Medical University of Vienna, Austria)

Alerting attention is sufficient to induce a phase-dependent behavior

Georgios Mentzelopoulos (University of Pennsylvania, USA)
Nicolette Driscoll (Massachusetts Institute of Technology, USA)
Sneha Shankar (University of Pennsylvania, USA)
Brian Kim (Drexel University, USA)
Ryan Rich (Drexel University, USA)
Guadalupe Fernandez-Nunez (Drexel University, USA)
Harrison Stoll (Drexel University, USA)
Brian Erickson (Drexel University, USA)
John Medaglia (Drexel University, USA)
Flavia Vitale (University of Pennsylvania, USA)

Fabrication of Expandable Cuff Electrodes for Selective Stimulation of the Human Vagus Nerve

Ahmad Shah Idil (University College London, United Kingdom)
Enrico Ravagli (University College London, United Kingdom)
David Holder (University College London, United Kingdom)
Kirill Aristovich (University College London, United Kingdom)

Computational Simulation of Optimized Structure for Polymer-based 3D Microelectrode Array in Subretinal Stimulation

Dong Hyeon Lee (Pusan National University, Korea (South))
Joonsoo Jeong (Pusan National University, Korea (South))

Chronic recording of peripheral sensory nerve signals using flexible penetrating microelectrode array

Byung Wook Park (Daegu Gyeongbuk Institute of Science & Technology, Korea (South))
Jaewon Jang (Daegu Gyeongbuk Institute of Science & Technology, Korea (South))
Sohee Kim (Daegu Gyeongbuk Institute of Science & Technology, Korea (South))

Thursday Poster Sessions

Thursday, April 27, 10:00 – 11:00 & 13:00 – 14:00

Room: 314-317

Motor reanimation in a Case of Cervical Spinal Cord Injury using Upper-Limb Motor-Imagery based ElectroCorticography Brain-Computer Interface

Kevin C Davis (University of Miami, USA)
Iahn Cajigas (University of Pennsylvania, USA)
Benyamin Meschede-Krasa (Massachusetts Institute of Technology, USA)
Noeline Prins (University of Ruhuna, Sri Lanka)
Charles Alver (University of Miami, USA)
Sebastian Gallo (University of Miami, USA)
Shovan Bhatia (Georgia Institute of Technology, USA)
John Abel (Massachusetts Institute of Technology, USA)
Jasim Naeem (University of Miami, USA)
Matthew Morrison (University of Miami, USA)
Wesley Rifai (University of Miami, USA)
Letitia Fisher (University of Miami, USA)
Michael E Ivan (University of Miami, USA)
Emery Brown (Massachusetts General Hospital - Harvard Medical School - M.I.T., USA)
Jonathan R Jagid (University of Miami, USA)
Abhishek Prasad (University of Miami, USA)

A platform to elicit and record intramuscular EMG signals from anesthetized mice

Aritra Kundu (Imperial College London, United Kingdom)
Jimmie Gmaz (Imperial College London, United Kingdom)
Simon Avrillon (Imperial College London, United Kingdom)
Rejin Varghese (Imperial College London, United Kingdom)
Agnese Grison (Imperial College London, United Kingdom)
Dario Farina (Imperial College London, United Kingdom)

Tactile Percept Formation and Integration for Object Feature Encoding with Electrical Stimulation

Leah Marie Roldan (Case Western Reserve University & Louis Stokes Cleveland VA Medical Center, USA)
Emily Graczyk (Case Western Reserve University & Louis Stokes Cleveland VA Medical Center, USA)
Dustin J Tyler (Case Western Reserve University & Louis Stokes Cleveland VA Medical Center, USA)

Usage of Peripheral Nerve Stimulation Occurs Along the Neuroaxis

Nabeel H Chowdhury (Case Western Reserve University, USA)
Dustin J Tyler (Case Western Reserve University & Louis Stokes Cleveland VA Medical Center, USA)

Proportional Myoelectric Control of a Portable Bionic Lower Limb Prosthesis

Nicole Stafford (University of Florida, USA)
Daniel P. Ferris (University of Florida, USA)

State-dependent neural biomarker of arousal predicts therapeutic transition in depressive state using responsive neurostimulation

Ankit N Khambhati (University of California San Francisco, USA)
Noah Stapper (University of California San Francisco, USA)
Daniela A Astudillo Maya (University of California San Francisco, USA)
Catherine Henderson (University of California San Francisco, USA)
Joshua Cohen (University of California San Francisco, USA)
Kristin K Sellers (University of California San Francisco, USA)
Joline Fan (University of California San Francisco, USA)
Vikram R Rao (University of California San Francisco, USA)
Katherine W Scangos (University of California San Francisco, USA)
Edward F Chang (University of California San Francisco, USA)
Andrew D Krystal (University of California San Francisco, USA)

Supraspinal Response to Spinal Cord Stimulation in Multiple Brain Areas along the Somatosensory Pathway

Jacob Slack (Purdue University Indianapolis, USA)
Amol P Yadav (Indiana University, USA)

Adversarial Stimuli: Attacking Brain-Computer Interfaces via Perturbed Sensory Events

Bibek Upadhayay (University of New Haven, USA)
Vahid Behzadan (University of New Haven, USA)

Classifying physical activity states based on internal accelerometry for Parkinson's disease treatment

Farzana Yasmin Boby (California State University, Los Angeles, USA)
Deborah Won (California State University, Los Angeles, USA)
Erick Rojas-Torres (California State University, Los Angeles, USA)
Stephen L. Schmidt (Duke University, USA)
Dennis A. Turner (Duke University Medical Center, USA)

Miniaturized magnetoelectric implants for robust and high-power bioelectronic applications

Joshua E Woods (Rice University, USA)
Fatima Alrashdan (Rice University, USA)
Amanda Singer (Rice University, USA)
Sunil Sheth (University of Texas Health, USA)
Sameer Sheth (Baylor College of Medicine, USA)
Allison Post (Texas Heart Institute, USA)
Mehdi Razavi (Texas Heart Institute, USA)
Jacob Robinson (Rice University, USA)

A Synchronous Multi-Channel Recording System Based on a Ring Resonator Array

Hans Ajieren (Johns Hopkins University, USA)
Pedro Irazoqui (Johns Hopkins University, USA)

Optimized electrical transcorneal stimulation as a therapeutic approach for retinal degeneration

Ege Iseri (University of Southern California, USA)
Pragya Kosta (University of Southern California, USA)
Pei-An Lo (University of Southern California, USA)
Dimitrios Pollalis (University of Southern California, USA)
Jean-Marie Charles Bouteiller (University of Southern California, USA)
Gianluca Lazzi (University of Southern California, USA)

Spatially Multiplexed Electrical Stimulation to Reproduce the Neural Code in the Primate Retina

Andrew J Phillips (Stanford University, USA)
Nishal P Shah (Stanford University, USA)
Madeline R Hays (Stanford University, USA)
Sasidhar Madugula (Stanford University, USA)
Jeff B Brown (Stanford University, USA)
Pawel Hottowy (AGH University of Science and Technology, Poland)
Alexander Sher (University of California, Santa Cruz, USA)
Alan Litke (University of California, Santa Cruz, USA)
Eduardo J. Chichilnisky (Stanford University, USA)

A Scalable Open-Source Cochlear Implant with Multipolar Stimulation

Abraham Akinin (Lawrence Livermore National Laboratory, USA)
Erin Graf (Lawrence Livermore National Laboratory, USA)
Michael Triplett (Lawrence Livermore National Laboratory, USA)
Razi-ul M Haque (Lawrence Livermore National Laboratory, USA)

Development of a wireless headstage for ECoG/LFP recording of freely-moving animals

Taro Kaiju (National Institute of Information and Communications Technology, Japan)
Masato Inoue (National Institute of Information and Communications Technology, Japan)
Masayuki Hirata (Osaka University, Japan)
Takafumi Suzuki (National Institute of Information and Communications Technology, Japan)

Microfabrication of a Flexible and Transparent Neural Electrode Array based on Cyclic Olefin Copolymer

Yoon Seo (Pusan National University, Korea (South))
Joonsoo Jeong (Pusan National University, Korea (South))

Thursday Poster Sessions

Thursday, April 27, 10:00 – 11:00 & 13:00 – 14:00

Room: 314-317

Expanding In-Ear Sensing for Health Monitoring

Akshay Paul (University of California San Diego, USA)
Min S Lee (University of California San Diego, USA)
Yuchen Xu (University of California San Diego, USA)
Tae H Joung (University of California San Diego, USA)
William David Hairston (Army Research Lab, USA)
Gert Cauwenberghs (University of California San Diego, USA)

Disrupting unwanted neuronal oscillations with closed-loop stimulation

Domingos Leite de Castro (University of Porto & Institute for Research and Innovation in Health, Portugal)
Miguel Aroso (Institute for Research and Innovation in Health, Portugal)
A. Pedro Aguiar (University of Porto, Portugal)
David B Grayden (University of Melbourne, Australia)
Paulo Aguiar (Institute for Research and Innovation in Health, Portugal)

Neurorehabilitation

Motor Evoked Potential Input-Output Curves Indicate Neuroplasticity After Cervical Spinal Cord Injury

Thibault Roumengous (Virginia Commonwealth University, USA)
Yeajin Cho (Virginia Commonwealth University, USA)
Yasmina Zeineddine (Virginia Commonwealth University, USA)
Carrie Peterson (Virginia Commonwealth University, USA)

Assessment of Mental Stress During 240-Days Isolation and Confined Environment using EEG Signals

Fares Al-Shargie (American University of Sharjah, United Arab Emirates)
Saleh Al-Ameri (Mohammed Bin Rashid Space Center, United Arab Emirates)
Abdulla Al-Hammadi (Mohammed Bin Rashid Space Center, United Arab Emirates)
Schastlivtseva Daria Vladimirovna (Russian Academy of Sciences, Russia)
Usman Tariq (AUS, United Arab Emirates)
Hasan Al-Nashash (American University of Sharjah, United Arab Emirates)

Combined Action Observation, Motor Imagery and SSMVEP BCI Enhances Movement Related Cortical Potential

Aravind Ravi (University of Waterloo, Canada)
James Tung (University of Waterloo, Canada)
Ning Jiang (University of Waterloo, Canada)

Assessment of Impaired Finger Independence of Stroke Survivors: A Preliminary Study

Jiahao Fan (Penn State University, USA)
Henry Shin (University of North Carolina at Chapel Hill, USA)
Xiaogang Hu (Penn State University, USA)

A stand-alone Augmented Reality intervention for chronic pain using embodied systolic stimulation

Oliver A Kannape (University Hospital Geneva & MindMaze SA, Switzerland)
Jonathan Pierret (IRR Nancy, France)
Robert Leeb (MindMaze SA, Switzerland)
Sylvain Cardin (École Polytechnique de Lausanne, Switzerland)
Fabien Bourban (MindMaze SA, Switzerland)
Skander Mensi (MindMaze SA, Switzerland)
Yann Lebrun (MindMaze SA, Switzerland)
Nicolas Merlini (MindMaze SA, Switzerland)
Alexis Dorier (MindMaze SA, Switzerland)
Vincent Moriot (IRR Nancy, France)
Amélie Touillet (IRR Nancy, France)
Andrea Serino (University Hospital Lausanne, Switzerland)

Modified carbon dots for potential flexible electrode applications

Amaal A Ali (American University of Sharjah, United Arab Emirates)
Mohammad Al-Sayah (American University of Sharjah, United Arab Emirates)
Amani Al-Othman (American University of Sharjah, United Arab Emirates)
Hasan Al-Nashash (American University of Sharjah, United Arab Emirates)

Investigating the relationship between cue immersion and the strength of motor imagery during hand and wrist movements

Christopher L. Hunt (Johns Hopkins University, USA)
Keqin Ding (Johns Hopkins University, USA)
Christoph S. Wagner (University of Edinburgh, United Kingdom)
Nicolas Berberich (Technische Universität München & Institute for Cognitive Systems, Germany)
Karahan Yilmazer (Technische Universität München, Germany)
Gordon Cheng (Technische Universität München, Germany)
Marlis Gonzalez-Fernandez (Johns Hopkins University, USA)
Nitish Thakor (Johns Hopkins University & Singapore Institute for Neurotechnology (SINAPSE), USA)

Orderly Motor Unit Activation Using Sinusoidal Low Frequency Alternating Current Stimulation

Awadh Alhawwash (Purdue University & King Saud University, USA)
M. Ryne Horn (Indiana University & Purdue University Indianapolis, USA)
Nathaniel Lazorchak (Indiana University & Purdue University Indianapolis, USA)
Ken Yoshida (Indiana University & Purdue University Indianapolis, USA)

Simultaneous Modulation of Cortical Activity and Phantom Pain in a Patient with Brachial Plexus Injury

Ali Asghar Asghar Zarei (Aalborg University, Denmark)
S. Farokh Atashzar (New York University, USA)
Winnie Jensen (Aalborg University, Denmark)
Armita Faghani Jadidi (Aalborg University, Denmark)
Romulus Lontis (Aalborg University, Denmark)

Human-Centered Design of a Vibrotactile Sensory Substitution Belt for Feet Somatosensation in a Patient with Multiple Sclerosis

Nicolas Berberich (Technische Universität München & Institute for Cognitive Systems, Germany)
Laura Pilger (Technische Universität München, Germany)
Natalia Paredes-Acuna (Technische Universität München & Institute for Cognitive Systems, Germany)
Julio Rogelio Guadarrama Olvera (Technische Universität München, Germany)
Florian Bergner (Intouch-Robotics GmbH, Germany)
Adrian Dendorfer (Technische Universität München, Germany)
Daniel Utpadel-Fischler (Technische Universität München, Germany)
Gordon Cheng (Technische Universität München, Germany)

Exploring reconstruction of motor and sensory function through targeted reinnervation in rat model

Yuxin Ma (Zunyi Medical University, China)
Chunxiao Tang (Zunyi Medical University, China)
Guangfa Xiang (Zunyi Medical University, China)
Lin Yang (The Shenzhen Institutes of Advanced Technology of the Chinese Academy of Science, China)

Frontal gamma as a marker of effective training during neurofeedback to improve memory in patients with mild cognitive impairment

Yayu Lin (University of California San Diego, USA)
I-Wei Shu (University of California San Diego, USA)
Fiza Singh (University of California San Diego, USA)

Thursday Poster Sessions

Thursday, April 27, 10:00 – 11:00 & 13:00 – 14:00

Room: 314-317

Can the crossmodal congruency task be a proxy for intuitiveness of sensory feedback in lower limb amputees?

Rohit Bose (University of Pittsburgh & Rehab Neural Engineering Labs, USA)

Bailey Petersen (University of Pittsburgh, USA)

Roberta Klatzky (CMU, USA)

Lee Fisher (University of Pittsburgh, USA)

Entrainment of Cerebellar Nuclear Cells via AC Stimulation of the cerebellar Cortex

Qi Kang (New Jersey Institute of Technology, USA)

Eric J Lang (NYU Grossman School of Medicine, USA)

Mesut Sahin (New Jersey Institute of Technology, USA)

Cognitive-motor performance assessment during in-person and remote practice of action sequences

Alexandra Shaver (University of Maryland, USA)

Rodolphe J. Gentili (University of Maryland & Maryland Robotic Center & Neuroscience and Cognitive Science Program, USA)

James Reggia (University of Maryland, USA)

James Putilo (University of Maryland, USA)

Christopher Gaskins (University of Maryland, USA)

Calvin M Lu (War Related Illness and Injury Center, USA)

Pilot Performance a Chronic Intraneural Auditory Neuroprosthesis in Felines

William M Thomas (University of Utah, USA)

Richard K Gurgel (University of Utah, USA)

David Warren (University of Utah, USA)

Automating visual feedback in H-reflex operant conditioning studies: Feasibility and first steps

John McLinden (University of Rhode Island, USA)

Darren E Gemoets (National Center for Adaptive Neurotechnologies, USA)

Daniel Hahn (National Center for Adaptive Neurotechnologies, USA)

Jodi Brangaccio (National Center for Adaptive Neurotechnologies, USA)

Yalda Shahriari (University of Rhode Island, USA)

Jonathan R Wolpaw (National Center for Adaptive Neurotechnologies, USA)

James J. S. Norton (National Center for Adaptive Neurotechnologies, USA)

Linear versus Nonlinear Muscle Networks: A Case Study to Decode Hidden Synergistic Patterns During Dynamic Lower-limb Tasks

Rory O'Keefe (New York University, USA)

Vaibhavi Rathod (New York University, USA)

Seyed Yahya Shirazi (New York University, USA)

Sarmad Mehrdad (New York University, USA)

Alexis Edwards (New York University, USA)

Smita Rao (New York University, USA)

S. Farokh Atashzar (New York University, USA)

Asymmetric Changes in Intersegmental Covariation Across Ambulation Levels and Prosthetic Devices for Transfemoral Amputee Gait

Nili E Krausz (Weizmann Institute of Science, Israel)

Tamar Flash (Weizmann Institute of Science, Israel)

Perilaryngeal Functional Muscle Network in Patients with Vocal Hyperfunction - A Case Study

Rory O'Keefe (New York University, USA)

Seyed Yahya Shirazi (New York University, USA)

Sarmad Mehrdad (New York University, USA)

Tyler Crosby (New York University, USA)

Aaron Johnson (New York University, USA)

S. Farokh Atashzar (New York University, USA)

Motor-Cognitive Dual-Task Paradigm Affects Timed Up & Go (TUG) Test Outcomes in Stroke Survivors

Masoud Abdollahi (Rochester Institute of Technology, USA)

Pranav Madhav Kuber (Rochester Institute of Technology, USA)

Mekayla Pierce (Boston University, USA)

Kara Cristales (Unity Hospital, USA)

Mary Dombovy (Unity Hospital, USA)

Jennifer LaLonde (Unity Hospital, USA)

Ehsan Rashedi (Rochester Institute of Technology, USA)

Variability in Depolarization Sensitivity Underlies Differential Responses to High-frequency Stimulation of ON and OFF RGCs

Jae-Ik Lee (Massachusetts General Hospital & Harvard Medical School, USA)

Assistive Multimodal Wearable for Open Air Digit Recognition Using Machine Learning

John M Rattray (Johns Hopkins University, USA)

Max Ujhazy (Duquesne University, USA)

Robert Stevens (Johns Hopkins University, USA)

Ralph Etienne-Cummings (John Hopkins University, USA)

Effects of EEG Analysis Window Location on Classifying Spoken Mandarin Monosyllables

Mingtao Li (Southern University of Science and Technology, China)

Shangdi Liao (Southern University of Science and Technology, China)

Sio Hang Pun (University of Macao, Macao)

Fei Chen (Southern University of Science and Technology, China)

Improvements in muscle recruitment selectivity by multielectrode transcutaneous spinal cord stimulation

Noah Bryson (Washington University in St. Louis, USA)

Jie Fei (Washington University in St. Louis, USA)

Rachel Hawthorn (Washington University in St. Louis, USA)

John Peiffer (Northwestern University, USA)

Ismael Seáñez (Washington University in St. Louis, USA)

Enhancing P300-based brain-computer interface Performance through attention-elevated stimulation

Jongsu Kim (UNIST, Korea (South))

Sung-Phil Kim (UNIST, Korea (South))

The Comfort of Temporal Interference Stimulation: Computational and Psychophysical Evaluation

Leen Jabban (University of Bath, United Kingdom)

Benjamin W Metcalfe (University of Bath, United Kingdom)

Electrical brain activity during mechanical bodyweight-supported walking does not differ between genders

Seongmi Song (Texas A&M University, USA)

Andrew D Nordin (Texas A&M University, USA)

Wearable MXene-Bioelectronics for Diagnostics, Precision Rehabilitation, and Prosthetics Control

Raghav Garg (University of Pennsylvania, USA)

Nicolette Driscoll (Massachusetts Institute of Technology, USA)

Sneha Shankar (University of Pennsylvania, USA)

Todd Hullfish (University of Pennsylvania, USA)

Eugenio Anselmino (Scuola Superiore Sant'Anna, Italy)

Francesco Iberite (Scuola Superiore Sant'Anna, Italy)

Spencer Averbeck (University of Pennsylvania, USA)

Manini Rana (University of Texas at Austin, USA)

Silvestro Micera (Scuola Superiore Sant'Anna, Italy & EPFL, Switzerland)

Josh Baxter (University of Pennsylvania, USA)

Flavia Vitale (University of Pennsylvania, USA)

Thursday Poster Sessions

Thursday, April 27, 10:00 – 11:00 & 13:00 – 14:00

Room: 314-317

Implanted Pulse Generators in Lower Extremity Neuroprostheses: a 25-Year Review

Lizabeth A. Leapo (Case Western Reserve University, USA)
Michael Miller (Louis Stokes Cleveland Veterans Affairs Medical Center, USA)
Ronald J Triolo (Case Western Reserve University, USA)

A wirelessly driven passive cuff electrode for temporal interference stimulation in peripheral nerves

Michael T Williams (Johns Hopkins University, USA)
Pedro Irazoqui (Johns Hopkins University, USA)

A novel brain-machine interface (BMI) system for motor rehabilitation in a severely impaired chronic stroke participant

Preeya Khanna (University of California, Berkeley, USA)
Andrea Sarasola-Sanz (TECNALIA San Sebastián, Spain)
Nerea Irastorza-Landa (TECNALIA San Sebastián, Spain)
Julius Klein (TECNALIA San Sebastián, Spain)
Je Hyung Jung (TECNALIA San Sebastián, Spain)
Amaia Miguel (Facultad de Medicina y Enfermería UPV EHU Leioa, Spain)
Leire Santisteban (Facultad de Medicina y Enfermería UPV EHU Leioa, Spain)
Cristina Chueca (Facultad de Medicina y Enfermería UPV EHU Leioa, Spain)
Suraj Gowda (University of California Berkeley, USA)
Siddharth Dangi (University of California Berkeley, USA)
Eduardo López-Larraz (Bitbrain, Spain)
Iñaki Ortego-Isasa (TECNALIA San Sebastián, Spain)
Alejandro Carrasco (Hospital Universitario Cruces Osakidetza Bilbao, Spain)
Guillermo Carbayo (Hospital Universitario Cruces Osakidetza Bilbao, USA)
Noemi Díez, Iñigo Pomposo (Hospital Universitario Cruces Osakidetza Bilbao, Spain)
Adolfo López de Munain (Hospital Universitario Cruces Osakidetza Bilbao, Spain)
Niels Birbaumer (University of Tübingen, Germany)
Joseph McIntyre (TECNALIA San Sebastián, Spain)
Ana Bengoetxea (Faculté Des Sciences de La Modtricité Université Libre de Bruxelles Brussels, Belgium)
Eduardo Ramos (Hospital Universitario Donostia Osakidetza San Sebastian, Spain)
Jose Carmena (University of California-Berkeley, USA)
Ander Ramos-Murguialday (TECNALIA San Sebastián, Spain)

Engagement feedback activates stronger motor cortex activities in VR motor exercise

Hyunmi Lim (Keimyung University, Korea (South))
Jeonghun Ku (Keimyung University, Korea (South))

Distraction effects of speech perception and production on ERP-based BCI

Minju Kim (UNIST, Korea (South))
Dong-uk Kim (UNIST, Korea (South))
Sung-Phil Kim (UNIST, Korea (South))

Electrode Positions in One-size-fits-all Device for Motor-Related Electroencephalography

Mori Fukuda (Keio University, Japan)
Junichi Ushiba (Keio University, Japan)

Surface EMG features during wrist flexion-extension in Huntington's disease

Vitória S Fahed (University College Dublin, Ireland)
Emer Doherty (University College Dublin, Ireland)
Caitlin McDonald (University College Dublin, Ireland)
Jérémy Liegey (University College Dublin, Ireland)
Monica Busse (Cardiff University, United Kingdom)
Jennifer Hoblyn (Bloomfield Health Services, Ireland)
Madeleine Lowery (University College Dublin, Ireland)

Sensory Neuroprosthesis Improves Recovery from Treadmill Induced Stumbles

Suzhou Li (Case Western Reserve University, USA)
Ronald J Triolo (Case Western Reserve University, USA)
Hamid Charkhar (Case Western Reserve University, USA)

DC stimulation with optic nerve cuff electrode for electrically-mediated survival of transplanted retinal ganglion cells

Brett Collar (Johns Hopkins University, USA)
Natalie Meyer (Johns Hopkins University, USA)
Marzieh Mowlavi Vardanjani (Johns Hopkins University, USA)
Thomas V Johnson (Johns Hopkins University, USA)
Pedro Irazoqui (Johns Hopkins University, USA)

Adapting In- and Out-Field-Of-View Processing in Hearing Aids Diminishes Listening Effort Indexed by EEG Phase Organization

Adrian Mai (Saarland University, Germany)
Maja Serman (WS Audiology, Germany)
Sebastian Best (WS Audiology, Germany)
Niels Sogaard Jensen (WS Audiology, Germany)
Cecil Wilson (WS Audiology, Germany)
Jurek Foellmer (WS Audiology, Germany)
Andreas Schroeder (Saarland University, Germany)
Daniel J. Strauss (Saarland University, Germany)
Farah Irene Corona-Strauss (Saarland University, Germany)

Restoring sensations by percutaneous spinal cord stimulation in people with lower-limb amputation

Rohit Bose (University of Pittsburgh)
Ameya Nanivadekar (University of Pittsburgh, USA)
Bailey Petersen (University of Pittsburgh, USA)
Devapratim Sarma (Carnegie Mellon University, USA)
Ashley Dalrymple (Carnegie Mellon University, USA)
Juhi Farooqui (Center for Neural Basis of Cognition, USA)
Elizaveta Okorokova (University of Chicago, USA)
Tyler Madonna (University of Pittsburgh, USA)
Beatrice Barra (University of Pittsburgh, USA)
Isaiah Levy (University of Pittsburgh Medical Center, USA)
Eric Helm (University of Pittsburgh Medical Center, USA)
Vincent Miele (University of Pittsburgh Medical Center, USA)
Michael Boninger (University of Pittsburgh, USA)
Marco Capogrosso (University of Pittsburgh, USA)
Sliman Bensmaia (University of Chicago, USA)
Douglas J Weber (Carnegie Mellon University, USA)
Lee Fisher (University of Pittsburgh, USA)

The Phantom Menace: Transcutaneous Spinal Cord Stimulation to Reduce Phantom Limb Pain

Ashley Dalrymple (Carnegie Mellon University, USA)
Lee Fisher (University of Pittsburgh, USA)
Douglas Weber (Carnegie Mellon University, USA)

Paired-pulse extracellular electrical stimulation for selective activation of retinal ganglion cells

Sasidhar Madugula (Stanford University, USA)
Ramandeep Vilku (Stanford University, USA)
Madeline R Hays (Stanford University, USA)
Andrew J Phillips (Stanford University, USA)
Alex R. Gogliettino (Stanford University, USA)
Pawel Hottowy (AGH University of Science and Technology, Poland)
Alexander Sher (University of California, Santa Cruz, USA)
Alan Litke (University of California, Santa Cruz, USA)
Eduardo J. Chichilnisky (Stanford University, USA)

Thursday Poster Sessions

Thursday, April 27, 10:00 – 11:00 & 13:00 – 14:00

Room: 314-317

Textile-based wireless EMG wearable system for prosthetic arm control

Korine Ohiri (Johns Hopkins University Applied Physics Laboratory, USA)
Luke Osborn (Johns Hopkins University Applied Physics Laboratory, USA)
Rebecca Williams (Johns Hopkins University Applied Physics Laboratory, USA)
Eric Nguyen (Johns Hopkins University Applied Physics Laboratory, USA)
Christopher Dohopolski (Johns Hopkins University Applied Physics Laboratory, USA)
Courtney Moran (Johns Hopkins University Applied Physics Laboratory, USA)
Madison Kelly (Henry M. Jackson Foundation for the Advancement of Military Medicine, USA)
Paul Pasquina (Walter Reed National Military Medical Center, USA)
Luke Currano (Johns Hopkins University Applied Physics Laboratory, USA)
Robert Armiger (Johns Hopkins University Applied Physics Laboratory, USA)

Spinal cord stimulation reduces compensatory gait strategies in a subject with Spinal Muscular Atrophy

Serena Donadio (Rehab Neural Engineering Labs, USA)
Genis Prat Ortega (University of Pittsburgh, USA)
Scott Ensel (Rehab and Neural Engineering Labs, USA)
Paula Clemens (University of Pittsburgh, USA)
Peter Gerszten (University of Pittsburgh, USA)
Robert Friedlander (University of Pittsburgh, USA)
Lee Fisher (University of Pittsburgh, USA)
Elvira Pirondini (University of Pittsburgh, USA)
Marco Capogrosso (University of Pittsburgh, USA)

Alterations in motoneuron firing patterns with deep brain stimulation for Parkinson's disease

Jérémy Liegey (University College Dublin, Ireland)
Vitória S Fahed (University College Dublin, Ireland)
Ben O'Callaghan (University College Dublin, Ireland)
Richard A Walsh (Tallaght University Hospital, Ireland)
Madeleine Lowery (University College Dublin, Ireland)

Feasibility of using task-induced changes in resting state functional connectivity to predict motor recovery in post-stroke individuals

Kristin Schmidt (University of Delaware, USA)
Tamara Wright (University of Delaware, USA)
Andria J Farrens (University of Delaware, USA)
Henry Wright (University of Delaware, USA)
Susanne M Morton (University of Delaware, USA)
Fabrizio Sergi (University of Delaware, USA)

Stimulus Reconstruction Accuracy as Performance Measure of Split Processing Schemes in Hearing Aids During a Realistic Simulated Driving Situation

Sebastian Langguth (Saarland University, Germany)
Adrian Mai (Saarland University, Germany)
Maja Serman (WS Audiology, Germany)
Sebastian Best (WS Audiology, Germany)
Niels Sogaard Jensen (WS Audiology, Germany)
Cecil Wilson (WS Audiology, Germany)
Jurek Foellmer (WS Audiology, Germany)
Farah Irene Corona-Strauss (Saarland University, Germany)
Daniel J. Strauss (Saarland University, Germany)

Establishing a Biotic Connection to the Brain: An Innovative Transition Micro-Electrode Array Technology for Neural Recording and Stimulation

Yantao Fan (University of Utah, USA)
Simon Binder (University of Utah, USA)
Adrian Ehrenhofer (University of Dresden, Germany)
Michael Hantak (University of Utah, USA)
Tate Shepherd (University of Utah, USA)
Benozir Ahmed (University of Utah, USA)
Hunter J Strathman (University of Utah, USA)
Austin Koch (University of Utah, USA)
Christopher F Reiche (University of Utah, USA)
Jason Dennis Shepherd (University of Utah, USA)
Huanan Zhang (University of Utah, USA)
Patrick A Tresco (University of Utah, USA)
Steve Blair (University of Utah, USA)
Florian Solzbacher (University of Utah, USA)
Saeed Boroomand (University of Utah, USA)

Carbon nanotube yarns provide superior signal-to-noise ratio and higher information content from recordings in rodent sciatic nerve

Bhanu Prasad Kotamraju (Case Western Reserve University, USA)
Grant McCallum (Case Western Reserve University, USA)
Thomas E Eggers (Emory University, USA)
Dominique Durand (Case Western Reserve University, USA)

Reliability Testing of Thinned Tissue-Engineered Electronic Nerve Interfaces

Kenneth A Fluker, Jr. (University of Florida, USA)
Ladan G Jiracek-Sapieha (University of Florida, USA)
Jack W. Judy (University of Florida & UFNano, USA)

Differential Modulation Of Gamma Band Activity in EEG During Migraine In rodents

Fadi Aiman Gerges (Arizona State University, USA)
Jit Muthuswamy (Arizona State University, USA)
Bruce Towe (Arizona State University, USA)

High-Isolation Gaskets for High-Channel-Density Implantable Connectors

Paritosh Rustogi (University of Florida, USA)
Jack W. Judy (University of Florida & UFNano, USA)

Peripheral nerve inputs to the central NS

Phase Transfer Entropy to Assess Nonlinear Functional Corticokinematic Coupling

Jialin Peng (National Innovation Center for Advanced Medical Devices, China)
Fubing Zha (The First Affiliated Hospital of Shenzhen University, China)
Tianzhe Xie (National Innovation Center for Advanced Medical Devices, China)
Kai Yuan (The Chinese University of Hong Kong, Hong Kong)
Raymond Kai-Yu Tong (The Chinese University of Hong Kong, Hong Kong)
Shi-Chun Bao (National Innovation Center for Advanced Medical Devices, China)

Spatially-selective neuromodulation of efferent and afferent cardiac fibres in the cervical vagus nerve

Enrico Ravagli (University College London, United Kingdom)
Nicole Thompson (University College London, United Kingdom)
Ronald Challita (The University of California Los Angeles, USA)
Jeffrey Ardell (The University of California Los Angeles, USA)
David Holder (University College London, United Kingdom)
Kirill Aristovich (University College London, United Kingdom)

Thursday Poster Sessions

Thursday, April 27, 10:00 – 11:00 & 13:00 – 14:00

Room: 314-317

Application of direct current to the rat sciatic nerve can augment the sensory signal generated by plantar stimulation (1 page abstract)

David B Green (MetroHealth Medical Center, USA)
Shane A Bender (Case Western Reserve University & MetroHealth Medical Center, USA)
Gustaf M Van Acker (MetroHealth Medical Center, USA)
Kevin L. Kilgore (MetroHealth Medical Center, USA)
Niloy Bhadra (MetroHealth Medical Center, USA)
Tina L. Vrabec (MetroHealth Medical Center, USA)

Eliciting plantar sensation via nerve cuff electrodes in individuals with transtibial versus transfemoral amputation

Lindsey M Hauck (Case Western Reserve University & Louis Stokes Cleveland VA Medical Center, USA)
Hamid Charkhkar (Case Western Reserve University, USA)
Ronald J Triolo (Case Western Reserve University, USA)

EIT-based localisation of nerve fascicles using a FINE (flat interface) electrode array geometry

Enrico Ravagli (University College London, United Kingdom)
Ahmad Shah Idil (University College London, United Kingdom)
Vlad Marcu (Case Western Reserve University, USA)
Dustin J Tyler (Case Western Reserve University & Louis Stokes Cleveland VA Medical Center, USA)
David Holder (University College London, United Kingdom)
Kirill Aristovich (University College London, United Kingdom)

Sensory Neuroprosthesis Reduces the Cognitive Load during Dual-Task Walking in Individuals with Lower Limb Loss

Eileen Petros (Case Western Reserve University, USA)
Ronald J Triolo (Case Western Reserve University, USA)
Hamid Charkhkar (Case Western Reserve University, USA)

Injectable neurostimulators for occipital nerve stimulation (ONS) in awake, behaving rodents

Fadi Aiman Gerges (Arizona State University, USA)
Bruce Towe (Arizona State University, USA)
Zaman Mirzadeh (Barrow Neurological Institute, USA)
Jit Muthuswamy (Arizona State University, USA)

Speckle and coherent optical imaging

Cerebral Vascular Resistance is Dysregulated Following Resuscitation from Cardiac Arrest

Yuhang Fu (Johns Hopkins University, USA)
Yucheng Shen (Johns Hopkins University, USA)
Ze Ou (Johns Hopkins University, USA)
Johnnie A. Johnson (Johns Hopkins University, USA)
Arvind P. Pathak (Johns Hopkins University, USA)
Romergrzyko G. Geocadin (Johns Hopkins University, USA)
Nitish Thakor (Johns Hopkins University & Singapore Institute for Neurotechnology (SINAPSE), USA)
Janaka Senarathna (Johns Hopkins University, USA)

Non-contact coherent optical imaging of evoked in-vivo fast optical neural responses

Austen T Lefebvre (Johns Hopkins University, USA)
Nicole Steiner (Johns Hopkins University Applied Physics Laboratory, USA)
Carissa Rodriguez (Johns Hopkins University, USA)
Eyal Bar-Kochba (Johns Hopkins University Applied Physics Laboratory, USA)
Rahul Hingorani (Johns Hopkins University Applied Physics Lab, USA)
Brad Bazow (Johns Hopkins University Applied Physics Laboratory, USA)
Preston Peranich (Johns Hopkins University Applied Physics Laboratory, USA)
Jeremiah J. Wathen (Johns Hopkins University Applied Physics Laboratory, USA)

Virtual Hiring Event: Scientific & Professional Jobs at FDA

May 23 - 25, 2023
9:00 a.m. - 5:00 p.m. ET

The **Center for Devices and Radiological Health (CDRH)** at FDA is seeking candidates from a wide variety of backgrounds for scientific and professional jobs.

Join us for:

- Job Interviews
- Real-time engagement with professionals from CDRH
- Highlights of the CDRH employee experience
- Information on federal employee benefits

Registration period is open April 17 - May 25

Note: To be considered for a job interview, register by May 12.

Resumes received after May 12 may be given consideration for future employment opportunities.

To learn more about career opportunities and register for the job fair, visit us at fdacdrhjobs.vfairs.com
