SUBMISSION PROCESS & DEADLINES

March 6, 2024
Submission Deadline

March 20, 2024
Acceptance Notification

April 1, 2024
Registration Deadline

April 12, 2024
Video Submission Deadline

We invite all undergraduate students working on or interested in systems engineering to submit an abstract for presentation at the IEEE Systems Council Student Event to be held in Montreal, QC, Canada. After the event, the students will be invited to attend the SYSCON welcome reception at the nearby Delta Hotel in Montreal. There will be no registration fee for presenters.

Each abstract will go through the review process to assess quality, level of the work, relevance, and methodological vigor. There will be an option to present remotely if you are unable to travel to Canada. Presenters will have an opportunity to meet, discuss and network with researchers and educators from academia and industry. The event will provide an environment in which students already working and students new to the field can ask questions and share lessons learned.

Students working and/or interested in the system engineering areas including but not limited to system design, integration, hardware and software development, or management of a complete system are encouraged to submit an abstract.

Example of some topics are listed below:

- » Systems Engineering
- » Systems Architecture
- » Cyber Security
- » Modeling & Simulation
- » Robotics
- » Medical Applications
- » Environmental Systems
- » Sensory System
- » Transportation Systems
- » Energy Management and Sustainability
